>Barry, that says it does but they will be cheap of course, which precludes
much studio work.. however, for a 3 yr old I wouldn't sweat that. I would
not rush out and get a full set up of high dollar sabians or zildjians in
this instance, and ... well... for what your paying on this whole kit, I've
paid that for one higher end cymbal. My opinion is also that I would not get
the black.. they look dusty and nasty easy, and the wine red won't do that
or show fingerprints nearly as easily.

I'd say go for it, this looks like the right deal for the budding young
percussionist.

>I just had to post. I've been using ProTools LE 7.3 at school. We use it
because ProTools is the industry standard, and we should be teaching kids
to use the most relevant technology. But, it is so nice to get home to PARIS.
I'm using the crossover on an effect bus to remove everything below 3k before
feeding the send into the DP Pro hall. It sounds so sweet. Every time I
hit stop, I hear the most awesome, shimmering, swirling reverb.

It's nice to be home.

Mike

:)Are you serious ? I just ordered 100 of the - and I just want to store
data.

Taiyo Yuden 4.7GB DVD-R, 16X, Silver
Thermal, 100 Disc Spindle

real a guy he is.

<http://www.youtube.com/watch?v=VZcCtzU-e6Q&eurl=http://www.tisway.com/home.php>

I saw him tonight for the first time in a long while, and I'm just
impressed. He's full of love and sunshine, and hope. He's got something
cooking with George Duke and has been working with Chaka Khan on the jazz
cruise.

AAI'll probably give it a shot and hope he actually becomes the next Ringo
Starr. Thanks for all of the input.

I hear a lot of talk on various forums and publications about the "magic
buss compressor". I couldn't tell you whether the Duende version of the buss
compressor sounds anything at all like one of their hardware comps but I've
been playing around with this on some sub busses and on the main mix buss
(something I'm always really careful about) on a rock mix project I'm getting
ready to dig into this weekend. As I play around with the settings, when
inserted after a Portico 5042 (the tape emulator box) I start getting something
that I'm liking quite a bit, at least right now. I'm going to walk away from
it for the evening and approach it with some fresh ears in the morning, but

I think I really may end up liking this piece of kit. There's a nice quality and sense of headroom to the processing. I may get me a little closer to where I would like to be. It can be very transparent and big. Those here who are using native rigs might want to give it a spin. Different vibe from the UAD, but in a good way.

DeejFirst of all, DVDR+ is a newer format that, as one of the two standards, can be used on "more things", as far as I remember. Here's one of the internet sides with some explanations:
<http://www.videohelp.com/dvd>

 >>My brother bought his 8 year old daughter a 5 grand TD20 set (same as mine)
 and I almost fell over. This girl is a spoiled brat with no drive to do
 anything and this set will be a waste on her. Don't buy kids expensive stuff
 until they show years of talent and drive. Save the money.thanks DeeJ -

Yeah I've heard the box unit, (not used it) and like it a lot.

2 Qs:

Have you tried the Portico 5043 for buss compression?

Have you tried putting the Duende _before_ the 5042?

(What reasons do you think there are for the order of tape/comp?)

Thanks

Ted

>>2 Qs:

>Have you tried the Portico 5043 for buss compression?

Yes. I actually bought one and I compared it to the UAD 33609. they were
so close that I returned the 5043.

>Have you tried putting the Duende _before_ the 5042?

>

>(What reasons do you think there are for the order of tape/comp?)

I haven't tried that yet but I will. the reason for putting it before the bus comp is that the 5042 is a line amp/gain stage and can drive the summed signal into the comp to trigger more or less compression.

I'll be playing around with it some more this weekend and I'll report any miraculousness that I might find.

;)What's the latency on a kit like that?

>Hey DJ, we have a SSL 4000 G(E series Eqs) and the wave SSL plugs nails the
comps and eq's. AND, from what I hear, the Duende plugs are better!! :)

Using Nuendo, inserting the SSL buss comp does the same thing as the real board does.. The trick is to push the .:

-Make up (knob) 10

-Release auto (Auto)

-Threshold (1'oclock)

-Attack (1 or 3)
-Ratio (4)

All in all, PUSH THE MAKE UP!!! AND PULL THE THRESHOLD.. Man, you can feel you mix tighten up :). .

That's exactly what I have been doing today. 4:1 is you friend as well. I've got three songs in the can right now that I've been a bit less than happy with. It's a genre that I'm not used to woking with that much (sort of punkabilly stuff) and it's coming together like a big dawg!!!

This buss comp really can achieve the BIG thing without making the mix sound like the life has been squeezed out of it.

Me likey!!

It's interesting that you have to get away from Paris (or have worked extensively with another DAW) to really appreciate it. I had hardly any DAW experience before I bought Paris. The workarounds were a big factor in my moving to a native solution. since then, I've wished a number of times that I had kept my old Frankenstein rig together. It was a routing nightmare, but it never failed to deliver sonically. I think you should post a couple of pics of the Franken-rig if you have them
Deej

Just for old times sake

:~)

I'm attaching a .zip file of a word.doc flier that I did about 3 years ago
for a producer who was curious about the studio. There are pics embedded.
