>

> Isn't that 428 a heck of a nice pre for ~400 bucks per channel?

>
> Neil:) well, I would be looking to steal one for stupid no money

I really need to get a better high and would love to try the new
chandler model for \$800; a resold neve portico; and listen to
the ADL600.

I also want to save for John Hardy servo 990.

sheesh,

el the slut

> Can't wait to pick up the dig card... on the REALLY short list! :-)

Do it, I think you'll like the converters! And, then you can record that same piano at 88.2k through digi outs to get rid of the FIR filter ringing, and then let me know how it sounds :)

Neilhmmmmmm.....too easy eh????.....well, I could complicate things if

you need to feel pain.....

;O)

glad you're happening. enjoy.

There are plenty of good-sounding mics that just don't have the cachet that they should, and there are plenty of so-so mics that have great marketing or buzz-factor, yet they're average mics... then there's everything in-between, of course.

Dimi, if you really feel your mics are the shizznit, then what you need to do is to get a couple of your mics into the hands of some well-known people & let them gab about them before you try to sell them - don't evne tell them what kind of price point you're going for, just get some guys like George Massenburg, Fletcher, etc. - you know, maybe 4 or 5 guys that post online on PSW forii and the like - to review them. Get them each a prototype & see if you can get them talking about it. Then when one of them says something like: "This is the closest thing to the real deal I've ever heard!", then you upload your already-constructed website with pricing & everything & start selling them. Make sure you let epeople know there's a waiting list, too.. that somehow seems to increase the perceived value (a la' Stephen Paul & his famous one-year wait for anything you sent him).
