a Happy New Year!

JamesYikes - no one replied!!

Merry Christmas

TedA belated Merry Christmas to you and the PARIS community, James! I've been occupied with pressing family stuff during this season but I'm coming out of the thicket now, and it looks like Mike Audet has cool stuff under the tree for us! Hey guys!

ke load off the CPU but jeez Paris ran on late 90's PC's so I think it will be fine.

Thanks for the explanation about the DPC latency Mike and good to know that I could go to a NVIDIA Graphics card if I wanted to - Paris won't care. lastlaf51 wrote on Sun, 08 September 2019 09

f using PARIS. I wonder now if the adat cards came with their own software with a output patch block for the patch bay. Just a thought.

JeffSorry - busy week.

Still planning to drop one in. First I have to find one...

TVery sorry to hear this. I didn't know Brian personally, but I feel like I knew him from the PARIS video he made. He seemed like a great guy. He was basically the most famous PARIS user of all time, as far as I am concerned.

RIP Brian.

Can you run your paris on Windows 10? How is everyone doing? While going through the wiki in Wayback Machine, there are a few pages and downloads that were missing

3 on a harddrive a few years ago, but had no luck transferring it. So I've been running v2.2 and loving it. But I'd really like to use some of the features in 3. You've heard this hard luck story before I know, but if anyone can help please PM me. Thanks, Greg

Hi. I bought a Paris system with version 3 on a harddrive a few years ago, but had no luck transferring it. So I've been running v2.2 and loving it. But I'd really like to use some of the features in 3. You've heard this hard luck story before I know, but if anyone can help please PM me. Thanks, Greg

I'm crossing this bridge now myself. Any chance that PARISWiki could be restored or could you post those MIDI things here? I'm crossing this bridge now myself. Any chance that PARISWiki could be restored or could you post those MIDI things here?

Edit: Found the wiki on the wayback machine. Lots of great info - thanks! I'm looking for a Paris 3.0 manual if anyone might know where I could get one. Not sure if it was available in the old Paris Re
