drumtracks,=20
here I have one kick, two snares
(top/bottom) two overheads (L and =
R) one=20
ride and three toms
.
4. Now I put all auxes on pre post and I =
put all=20
faders down to zero.

5. I put all drumtracks in the stereo =
field i.e=20
Overheads L I open only aux1
and close aux2, the opposite for =
overhead R,=20
the volume now is on auxes
knob.
For kick I have both aux1 and =
aux 2=20
engaged with same volume for both
etc....

6 I can leave the =
return=20
of the drumtracks on auxes returns but I use
instead wire out #0 =
for aux 1=20
and wire out #1 for aux 2

7. Then I go to two free audio tracks =
and put=20
there wire in #0 and #1
accordingly.

8. I pan them hardwired =
left=20
and right. I can take it further with eq or
whatever from=20
there....

So I have a compressed drummix stereo with EDS =
compressor=20
using two
instances of EDS comp.

9. You can write down the=20
compressed stereo track and bring it in along with
unprocessed =
drumtracks=20
,slide it until it sounds right nad voila.

I really like the =
eds=20
compressor on gentle crush setting , I also favour=20
=
the
Opto.

Cheers,
Dimitrios

</BLOCKQUOTE ></BODY></HTM=

-----=_NextPart_000_00B6_01C5AB10.C45972B0--I am sure there are some of you that have
tried or still use the following
method.
How to group stereo drumtracks in Paris put them a stereo compressor just
using one stereo instance of EDS compressor.

1. I put on aux1 wire out #0
2. I do the same on aux2 putting wire out #1
3. I open aux1 and aux 2 on all drumtracks, here I have one kick, two snares (top/bottom) two overheads (L and R) one ride and three toms

..
4. Now I put all auxes on pre post and I put all faders down to zero.

5. I put all drumtracks in the stereo field i.e Overheads L I open only aux1 and close aux2, the opposite for overhead R, the volume now is on aux's knob.

For kick I have both aux1 and aux 2 engaged with same volume for both etc....

6 I can leave the return of the drumtracks on aux's returns but I use instead wire out #0 for aux 1 and wire out #1 for aux 2

7. Then I go to two free audio tracks and put there wire in #0 and #1 accordingly.

8. I pan them hardwired left and right. I can take it further with eq or whatever from there....

9. I now put a stereo instance EDS compressor compressor on the leftmost track with the following settings:
Gentle Crash algorithm with 1:75 setting -81.4 threshold and 17.5 db output.

So I have a compressed drummix stereo with EDS compressor using one stereo instance of EDS comp.

9. You can write down the compressed stereo track and bring it in along with unprocessed drumtracks ,slide it until it sounds right nad voila.

I really like the eds compressor on gentle crush setting , I also favour the Opto.

Cheers,

latency but no lack.
Cannot seem to make sound almost dissapear even if compression is not actually working , 1:1 ratio no threshold etc.
Can you try ?

gonna be some drunkass reptiles :)Ok,
Here is the other way of doing it .
You have only to move the original auxed drumtracks.
First you copy the drumtracks to adjastend tracks.
Then you aux the non copied with Stereo compressor as I detaled before.
Then you put faders at minimum -90 position for those drumtracks.
They now serve only for aux feeding.
Now you nudge them by 5ms to the left and put sampledelay on N

I vote we refrain from from any further rabid little partisan jabs.

You used a jokey, silly post by one of the best-natured members of this forum to deride a very large group of humans who do not share your belief system. That is inappropriate behavior, at best, given the very specific nature of this forum, and especially given the general good nature of those who post here.

I'm not aware of any real scientific challenge. People are entitled to their faith, but the Intelligent Design folks are just promoting Creationism under another name. There was a very good column in yesterday's NY Times pointing out that the folks promoting this admit themselves that they have put forward no scientific case. If people believe in this, fine, but it should be taught at home or at their churches.thank you very much...Heh.. I see what you're saying, but I should've been more specific. I'm not doing much on the client frontier these days, this is mainly my own data. Problem is I've collected all this info and it would take stacks and stacks and months to sift it all out to DVD+-R. Yikes, not looking forward to that! I need to find a good multidrive comparator program that will look at network drives as well and tell me where exact duplicates lie, because I'm just about sure that will be the case for at least 30% of my stuff.
