>This has been so easy I almost feel guilty. All I did was install the CPU, strap on the heatsink, install some RAM, hook it up to my PSU and drives, flash the bios, load some updated drivers and this seems to be done. I guess moving from an ASUS a7V8X-X mobo to an A8V-Deluxe mobo isn't that big a deal.I'm literally knocking on wood as I post this.

Getting ready to install my Magma host card and all of the other peripheral crap now so we'll see if the IRQ fireworks begin.

;o)
