Tom,

Did you lose the 442 yet?

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:468c700a@linux...

John,
Magma here, IRQs are very happy.

Deej,
Ya terminated for sure. To try the original setup
with my mobo means WC in series to mec A
then to mec B. Silly but that's the only way it worked.
David has the same issue with this ASUS mobo and a Lucid.

Never a dull moment here in Paris on 4rth of July.
Thanks guys,
Tom

Sorry about the theft. Your music seems really chord-driven rather than
lead-guitar driven and I think a fuzz-type pedal might mush out pretty
quick. For more grind without mush, I like the Barber Direct Drive.

<http://www.barberelectronics.com/directdrive.htm>

Yeah, they talk a lot about "vintage" this and that but the pedal has a
good grind to it.

See if there is somewhere you can try one out.

Also, I have heard that the Foxrox ZIM is great and you can swap cards
out to get what you want.

<http://www.foxroxelectronics.com/>

And there may be a fuzz that does just what you want that I have not
heard.

I have one of these:

Don't get me wrong, it's a great program and I love it, but there are bugs and instabilities that pros in the cubase forum mention regularly to such severity that they can't move over to C4 yet.

This is a "broken capsule due to humidity ,one main reason.
Youave these to options except from servicing it somewhere.
First you can turn around th capsule and use the mic in cardioid mode so the
"broken"side of the capsule will be in back.
ust unscrew the capsule and turn it 180o degrees and screwit again.
DO NOT TOUCH the membra

they brought me in when they decided they wanted to play on stage. So
I've added a more sleaze and lead to the band, which Nick in particular has
been enjoying. I'm also adding feedback parts and ebow things and slide bits
and capoed open tuning and all manner of stuff.

The other guitar player in my band uses the Barber pedal you describe, and
it sounds great on his (very clean) silver Fender Bassman, but my 'base'
sound is pretty gritty to start with and the Barber doesn't sound nearly
as good. The Foxrox looks interesting, though they don't have the fuzz cards
I'd be interested in done yet. I've played my last TS-9, or clone there of!

Anyway, thanks, I'll check out the Foxrox,
