ing smpte and use one for processing drums. I think I recall Brian T
saying something about using two Steiny Midex units, one sending smpte to

the other, and it being very close to sample accurate

hehehe.....but then.....WTF would I do with my native DAW???.....oh yeah.....Ivory!!!!

Run don't walk to the web or a local store where they are blowing out yamaha

P-60 consumer digital pianos.

The action hand's down blows away every controller I have ever played, including my Yamaha acoustic. They are being blown out for under \$600 bucks. Yes it has build in sounds and speakers, but nobody will make you use them :-)

-----000406090802020502060800--A friend just called me and he is putting together an outdoor blues festival gig (one day only) in Aztec New Mexico which is right down the road from here.

It's being sponsored by the Aztec Chamber or Commerce (yes, they actually have a budget) and it's going to get local radio promotion as the 1st Annual Animas River Blues (Festival)

If any of you guys would be interested, give me a call at 970-375-7081 or "e-me" at animix@animas.net and I'll hook you up.

Cheers,

Deejsorry, don't remember where that is. can you post a link please?

You might have heard me mention that HydroRecords.Com got nominated for a Boston Hip Hop Award for "Website Of The Year". The people running the awards have opened up online voting. I'd like to request your support in going to <http://www.massindustrycommittee.com/index2.php?page=nominees> to put in a vote for Hydro. If only because its one of the few web forums to support PARIS and I've always considered it an extension of this newsgroup. I believe you just need to register and vote.

Much Appreciated,
justcronWell thanks for that tip also. I wouldn't have thought of that.

>>1. Dimitrios - review the diagram and you will see why it is not possible
to swap the order of native/eds plugins. Data is streamed from disk through
the native section and then passed to the EDS. Once it's on the EDS - it's

there until it goes out one of the EDS outputs, or back to disk.

2. The signal flow for auxes is technically correct, but there is one interesting thing I noted in the internals of the paris mixer code... The aux outputs don't flow back to the global bus individually. All 8 Aux outputs sum down to a single stereo pair in the effects subsystem, then that sum passes on to the globals.

Chuckif you're a duck then yeah that's old. compared to deej don and myself you're still a punk. ;o)

Ugh. I just got a new computer, making sure it was up to snuff for my audio setup, in every respect... except one. The EDS won't fit due to a hard drive bay. I could move it, and get into some serious trouble by attempting some custom mounting, which I am certainly not qualified to do. Has anyone run an EDS in a Magma? Does anyone know what problems this could cause? Would I be better off risking the destruction of my computer by trying to mount

the hard drive bay elsewhere?

Thanks for any helpHi, does anybody have a solution, I tried to import a 16 bit wav stereo file, original was 54 meg, but paris just import 144k as stereo file.

I've got sound from the snip, but how do I get the rest? anyone who knows?

Thanks

Chris B I'm using 2 EDS cards in a 7 slot Avid branded magma chassis with no problems at all.

I think with PCI slots going the way of the Do Do, this is going to be the only way to use EDS cards with new computers.

All the best,

Mike

Once stripped, then you can bring it in as a stereo import into dual mono.

Just curious

DaleThanks Mike. Is your primary EDS in the Magma? Do they have Magmas for PCI express yet? One more question. Is the magma card that goes in your comp HUGE?
Thanks

Mine are all in the Magma and working perfectly.

As for PCI express:

http://www.mobl.com/expansion/products/pcie_expansion/6slot/index.html

And the host card is small. About the size of an old Adaptec 2940.

All the best,

Mike

>Thanks for any help I think I had some of these at one time. They were simple illustrations of the front panels of lots of different analogue processors. IIRC, there were *lots of them*.

Taking digital pics just isn't working for me. I usually create a little folder for each song with track notes, etc. Having these for noting the settings of the analog processors would be cool. I've also tried using the Notepad field in SX, but that's a PITA also.

I need to scribble on stuff. Anyone here know where I can DL these? Google isn't much help.

DeejHi,

I was mentioning if someone can help building the delay compensation plugin !

I kindly asked the wormhole author but he got a day time job now so he can't do that.

I also asked the voxengo guy but he dropped it.

I am not any Suoe Dimitrios as someone said about me (thanks anyway !)

I just asked if anyone is well acquainted with programming so to pass some ideas of how to build a latency compensator.

I will get in touch with a programmer here in Greece but nothing promised.

So please don't hold a candle to that.

Sorry if I have given the wrong impressions here about that compensator thing.

Regards,

Dimitrios

Dear Chuck,

Here is what I propose.

You send the reverb from Graig to anyone asking about it on a certain condition.

If Craig will sometime get in touch with you and he asks about getting paid we (receivers) of his reverb are bound to send him some money the highest

being say 50\$.
we also are bond not to give this away to anyone else.
Don't get me wrong here, just a proposition made to make things go faster
!!!
Let us know.
I sign the above.
Regards,
DimitriosSorry Chuck.
it is a Dimitrios proposal and not Chuck's !!!

Have you thought about maybe just creating a Word or Excel document that you can use to fill in the values for your processors? Might be a quick and easy solution and having an electronic version of the settings would make it easy to store and retrieve with projects.

Have a great weekend!

Mark

to use as photo-realistic templates.

it in a folder than any other method.>Which ones do you need?

Hmmmm.....letsee.....the analog stuff I patch into mixes
is.....uhhhhhh.....

Avalon 737

Forssell CS-1

Distressor

TL Audio Indigo EQ2012

SPL Transient Designer 4

SPL De-Esser

Joe Meek VC-1

RNC

Demeter H Series opto compressor

.....hmmmm.....come to think of it..... this really isn't a whole lot of stuff. The rest of what I use is UAD-1, Paris DSP and Sony, Lexicon or Quantec hardware and this all can be set to recall. Maybe I should shift my brain into gear, get up off my lazy ass and draw myself some templates for this gear.....or better yet, continue to sit on said lazy ass get the wife unit involved in this.....she's a graphics artist.....DOH!!!

;o)

Damn, misfire....

I think many of you might fall in love with this app I live for called TreePad Lite for Windows (or Linux, the files are compatible across both platforms. TreePad lite really an awesome to store and search for miscellaneous notes. Just download the free lite version and open my attached file. Press insert to add nodes/branches, drag nodes around, right click to sort and use the binoculars on the toolbar to search. This is my favorite app of all apps on the pc.

<http://www.treepad.com/download/>

Enjoy ! I use it to keep track of my life, I have about 20 of these treepads for all different subjects. Also the pro version exports as html like my site: www.kfocus.com/paris

ood.

http://www.hartdynamics.tv/video/QT_HS_VIDEO/drumsets/HART_STUDIO_MASTER_6-4_TD12.htmlWell of course, it's another schlub trying to shock the bourgeoisie.

But on a deeper level, it's a good example of what the enemy of souls desires for each of us.

None for me thanks...

ho-hum

DCHa no Behringer invloved.
Both have ULI IDE/SATA chipsets.

DJ wrote:
