not grow back either at all or properly/normally, which is not a big deal at all, of course, it's just a lot more tissue gone than they thought they'd have to take, but it's more on the upper area of the finger

, which doesn't have anything to do with playing anything. The great news is the side of the finger... the fact that they only had to go down about halfway there, all the way across; and didn't even have to touch the pad/underside at all (which it looked at first like they'd have to do)!

So all-in-all, I think I lucked-out! :))

Right now it's hurting like a son of a bitch, and no, they didn't give me any pain meds - which is probably fine because I need to be able to go into work, anyway.

It'll be all wrapped-up in this big ol' bandage until the end of the day today when i'm supposed to take it off, clean the area, and put a smaller one on... a process which i'm not looking forward to! lol

So, bottom line: better outcome than we originally thought, it'll be useless & just in the way for about two months for all practical purposes (it took me about a half an hour to type this reply, for example LO

Had a minimal session today. Paris performed but there are =
kooky
things going on. I'll post the error messages as soon as I get =
down there=20
again tonight.

Clean install or so I thought. Three cards, 3 C16s, 1 442.

SPDIF isn't outputting signal
2 of the 3 C-16s send now line to middle of song when double =
striking rewind.
No audio from card B except solo bu
