I was surprised who cares. Just got done doing a cd project for the "young
and hip". They say when they play music done here, their peers remark it
sounds diff

s studio here and he monitors through a passive volume control. His system sounds great BTW. It's the one that really opened my eyes as to how far PT has come sonically. This guy has gold and platinum records all over his studio walls so you're in good company ;o)

Anyway, I'm hoping this isn't taken as some kind of slam and more like offering useful info to help you achieve what you're looking for.

Best regards,

Deej

Yes, Neil!

This is the key. There is more knowledge per square monitor inch here than any other online spot I've found.

There seems to be someone here knows just about ANYTHING about ANYTHING. I wish I had the time to be here as much as I used to be. But I still scan the posts as often as possible.

-steveWhere on earth have you been? I was getting ready to put the dogs on your trail

;oP

You're a troll.

go away.Thank you and great job - I tryed the setting last night - nice!
