Buffers = lookahead, right?

Thanks, man. I appreciate the patience. My awareness is elsewhere other than technical stuff, for sure. Usually.

Hi, =

Tom.
I'm at a loss.
In the absense of a Steinberg/vstplugins =
folder, the=20
install creates a folder
in the Program Files directory called =
"solid state=20
logic". It dumps the SSL
LMC-1.dll there.
I just moved it, as =
you did ,=20
into my Paris VST plugins folder,
and it showed up.
Are you =
sure you=20
moved it to the very folder that Paris's config
is pointing =
to?
I=20
assume you are using XP.

ThanksWe lost it all a year ago or so. The business model was slowly failing due
to insane amounts of competition from local dumbasses who thought we were
millionaires and wanted a piece of the action, and from Starbucks, whose
business model relies largely upon letting locally-owned cafes find and
build the m

they are supposed to be fine now. I was told to get Seagates
and had one die before it finished formatting last week. I don't think
the noise level is all that different from a 7200 vto a 10,000rpm.

I'm buying WDs again and see what gives. Some are even using Maxtors =
again.
I know Chris Ludwig speced them into a system I will have him build.

Sorry. I forgot to post here about putting up the video. I actually have
a whole DVD of the entire concert, but never put it up for sale or otherwise
on my site. I get lazy!! LOL I got some great musicians to participate,
and it came off really nice.

I was under the impression that people needed Quicktime 7 to view it but
I am not sure about that. Maybe it is not needed.

Lou
