.

think Tom

was asking if there was a "3.0" version of the EDS card that =
needed

connected to the master. The answer to that would be no.
Is this =
what you

were asking Tom?
DJ's advice is very important though. I would do =
it, if

you haven't already.
I don't want to sound like a "RTFM" kind of =
guy, but

the Paris manual describes
this procedure pretty well.
It's on =
page 4

and 5 of the 3.0 version.
It kind of sounds to me like you may not =
be

hooking up the correct eds card
to the master mec.
