nly please.

Thanks,

-eBetter yet... go get the crack and put an end to the Pace and the IT
bullshit.

What everyone should be doing is complaining to the BBB that they are still
selling the broken, unsupported

I would also like one of the input cards for \$150.

Thanks.

br />

There is a full set on E-Bay that has the ribbon cables that you need along with cat-5 for C-16 and Interface cable for EDS1000 card...I think it was 30 bucks... You can get the 10 and 16 pin ribbon female connectors and some ribbon cable and make your own using a bench vice to press the cable into the connectors after you cut the cable to size...Looking for EDS-1000!!! If anyone has a card for sale,let me know...Thanks Dave.

Ed... if william ends up not buying yours I Will.I'm interested in the A8O Pro 24 if it is still available.

Dempsey
