I think it's cool that so many have switched but still hang out here! And, I think it's interesting (as a Paris user) to find out what other former Paris users find better.

I wonder if anyone switched but switched back?

Like what? Please fill me in.

Thanks a lot Dedric.Went from a mixed PARIS/SX environment to SX/Live. The feature bump was great,
esp faster than real time rendering, VSTi freezing, etc. Have been very happy since dropping PARIS but mostly because I'm not a 'rocker' really anymore. I do pretty much all electronic music and I think the 'hi-fi' sound of native apps might work a little better in SX than in PARIS.

That said, I'm playing in a power pop and right now and I would wuv that big PARIS crunchiness for that material.

And always remember, it's the golfer not the clubs . . .

I choose Polesoft Lockspam to fight spam, and you?
<http://www.polesoft.com/refer.html> True to an extent.. however if you're golfing with a tire iron instead of a 9 iron, things tend to suck no matter what :)

recorded there. the only thing that is now helping out is the new/old ('75) soundcraft B200 sidecar recently added. it was modded by the same people that did the beetles 200...nice sound.

Drums and percussion that are tuned in a manner that is harmonically related

will listen for clashes and only change pitches if I notice a problem, but
if I am doing drum replacement I will give pitch some consideration.
Gene'll go \$25 for each EDS card :-)

Gary,

Are you selling IRQs with the eds cards too?

That would make it an even better bargain!

Just kiddin',

Tom
