Far be it from me to suggest that this may be the way Behringer
pre's are, in fact, supposed to sound.

"DJ" <nowayjose@dude.net> wrote in message news:45a73099@linux...
I sent a post to the company where I purchased this bench. I received the following reply:

I sincerely apologize for any dissatisfaction you have with the Tech Station and I thank you for bringing this to my attention. I am having your complete purchase price including shipping refunded to your PayPal account right away, no need to return the unit you purchased. The Tech Stations are not for everyone and we do offer everyone a complete refund if unsatisfied...

About the quality issue, these are all made by hand as we are a small company and currently do not have the resources to automate the majority of the fabrication so there will be slight variances but nothing that should effect performance. Since your bench has some problems I can only assume that human error was at play, our fabricators were very much overworked the last couple months - not an excuse, just a potential reason - and I will be dealing with any quality control issues personally.

Thank you again for your feedback and I hope ther

e is some way we can
compensate you for your trouble and I'll do my best to address any additional concerns you may have.

That's a class act. I'm suddenly very impressed. I'll probably even give them another try when I build my dual octocore DAW next week.

;o)

"DJ" <nowayjose@dude.net> wrote in message news:45a70623@linux...

[http://www.highspeedpc.com/Merchant2/merchant.mv?Screen=CTGY
&Category_Code=TopTechSTD](http://www.highspeedpc.com/Merchant2/merchant.mv?Screen=CTGY&Category_Code=TopTechSTD)

I bought one back in October and have been too busy to unbox it until today. Terrible QC. Surfaces were predrilled exactly backwards and hardware assembly components were missing. It would have cost me more in time that it was worth to box it back up and ship it back so I redrilled it and went to Home Depot because I needed to finish this project, but I'm pissed off and would never buy another one of these. It's a good design once it's properly assembled though and I could put one together like this quick and for about

\$20.00 with just a little more effort than I spent getting this one up to speed.

Deej
