Ah the memories. Remember POKE codes? ;o)

<http://www.old-computers.com/museum/computer.asp?c=98>

And of course it was allegedly people from Commodore who went on to create Ensoniq...

Cheers,
Kim. Thought I'd share with everyone....

TheSoniq (that's his name, he's vietnamese) has been supporting Paris stuff for quite a few years, that I recall. My EDS went bad and I shipped it to him and for 300 bucks, got a refurbished perfectly working EDS. That was over 2 years ago. So I would save this link for you die-hard Paris users... Of course Paris stuff will get harder and harder to find... TheSoniq will hopefully continue to support fixing and selling Paris stuff. Here is his website. He is starting to expand it more now... Bookmark it and if you need parts, give him a call. He speaks broken English, but is very friendly and knows his Paris stuff!

<http://www.thesoniq.com/index.html>

You're Welcome....Anyone still using one? What's y

That's the talk! ;o) Beer money Beer money Beer money!! ;oP ;o)

No you guys don't need to worry about that. I've made a vow to myself that next pay I'm going to be more careful, and spend less money on funky hats and sunnies and more money on beer. ;o)

I'm just happy that I won't need to spend all my beer money on a UPS. ;o)

Cheers,
Kim. With Paris to your Cubase box I assume you mean?

I mean it must work in some context... otherwise it w

Could I slow down a song 10% without it sounding messed up? Speed it up 10%?

I like how Prince did his Camille/Bob George voice vari-speed thing back in the day.

Just wondered if Paris allowed for that sort of vari-speed latitude.

JimmyThis is on the FAT 32 machine.

>do you mean it wont find the networked share, or it can't even read the drive, like locally?<

It can't even read the drive, like locally.

-----=_NextPart_000_0027_01C65D19.9799EA50--Hi,

I was comparing eds compressor setting I found with LA2 from UAD1, I think you can tweak to make it sound the same.
Can anyone try these settings and compare with his UAD1 ?
If someone agrees I might sell then my UAD1 ? :)

Threshold: -96
Ratio: 1.40:1
Attack: 0.80
Release : 00000000
Lookahead 0.004 (lower gives more punch !! ,better than LA2)
Output 10.3

Regards,
DimitriosBy changing the ratio down to 1.25:1 and the lookahead up to 0.012 it is becoming frighteningly close to LA2

I think the whole new thing is that the EDS compressor becomes a wonderful compressor if you use 0 as release time as standard and -96 threshold then you can tailor the sound to your likings.

Cheers,
Dimitrios
