>ATTORNEY'S ADVICE - NO CHARGE

Read this and make a copy for your files in case you need to refer to it someday. Maybe we should all take some of his advice! A corporate Attorney sent the following out to the employees in his company.

1. Do not sign the back of your credit cards. Instead, put "PHOTO ID REQUIRED."

2.. When you are writing checks to pay on your credit card Accounts, DO NOT put the complete account number on the "For" line. Instead, just put the last four numbers. The credit card company knows the rest of the number, and anyone who might be handling your check as it passes through all the check processing channels won't have access to it.

3.. Put your work phone # on your checks instead of your home Phone. If you have a PO Box use that instead of your home address. If you do not have a PO Box, use your work address. Never have your SS# printed on your checks. (DUH!) You can add it if it is necessary. But if you have It printed, anyone can

get it.

4.. Place the contents of your wallet on a photocopy machine. Do both sides of each license, credit card, etc. You will know what you had in your wallet and all of the account numbers and phone numbers to Call and cancel. Keep the photocopy in a safe place. I also carry a Photocopy of my passport when I travel either here or abroad. We've all heard horror stories about fraud that's committed on us in stealing a Name, address, Social Security number, credit cards.

Unfortunately, I, an attorney , have firsthand knowledge because my Wallet was stolen last month. Within a week, the thief(S) ordered an Expensive monthly cell phone package, applied for a VISA credit card, had A credit line approved to buy a Gateway computer, received a PIN number From DMV to change my driving record information online, and more. But here's some critical information to limit the damage in case this happens to you or someone you know:

5.. We have been told we should cancel our credit cards immediately. But the key is having the toll free numbers and your card Numbers handy so you know whom to call. Keep those where you can find them.

6.. File a police report immediately in the jurisdiction where your credit cards, etc., were stolen. This proves to credit Providers you were diligent, and this is a first step toward an Investigation (if there ever is one).

But here's what is perhaps most important of all: (I never even thought to do this.)

7.. Call the 3 national credit reporting organizations Immediately to place a fraud alert on your name and also call the Social Security fraud line number. I had never heard of doing that until advised by a bank that called to tell me an application for credit was made over The Internet in my name. The alert means any company that checks your Credit knows your information was

stolen, and they have to contact you by Phone to authorize new credit.

By the time I was advised to do this, almost two weeks after the theft, all the damage had been done. There are records of all the Credit checks initiated by the thieves' purchases, none of which I knew about before placing the alert. Since then, no additional damage has been done, and the thieves threw my wallet away this weekend (someone turned it in). It seems to have stopped them dead in their tracks.

Now, here are the numbers you always need to contact about your wallet, etc., has been stolen:

- 1.) Equifax: 800-525-6285
- 2.) Experian (formerly TRW): 888-397-3742
- 3.) Trans Union : 800-6807289
- 4.) Social Security Administration (fraud line):800-269-0271

We pass along jokes on the Internet; we pass along just about everything. If you are willing to pass this information along, it could really help someone that you care about. **MARK YOUR CALENDAR FOR NEXT SATURDAY!**

As you may already know, it is a sin for a Muslim male to see any woman other than his wife naked, and that he must commit suicide if he does. So next Saturday at 4 PM. Eastern Time all American women are asked to walk out of their house completely naked to help weed out any neighborhood terrorists.

Circling your block for one hour is recommended for this anti-terrorist effort.

All men are to position themselves in lawn chairs in front of their house to prove they are not Muslims, and to demonstrate they think its okay to see nude women other than their wife and to show support for all American women.

Since Islam also does not approve of alcohol, a cold 6-pack at your side is further proof of your anti-Muslim sentiment.

The American government appreciates your efforts to root out terrorists and applauds your participation in this anti-terrorist activity.

God bless America.

It is your patriotic duty to pass this on.

Joke!The foxrox pedal is really cool, but they don't have the fuzz cards ready yet. Bummer. If I could get one germanium and one silicon fuzz (the first for fuzz and the second for freakout) I bet that would be a killer.

One of the reasons I'm doing this (besides the theft) is that I want more nastiness in my sounds. I sound like a former professional blues/jazz guitar player playing in a punky power pop band, 'cause that's what I am. In fact, that's a general problem with the Monx. My guitars sound too nice, my mixes sound too nice, my soft panned backing vox sound too nice, etc. and so on.

Maybe I'll just get a used Fulltone '69 pedal and a new '70 pedal. That should do the trick nicely.

>Over the weekend I got to see some classic rock acts for free at a festival.

I saw Mark Farner, he was good. Blue Oyster Cult they were Ok, and Paul Rogers. Paul Rogers was great! He still has a great voice, and the band was tight. I also saw Puddle of Mud, and they were good as well.

The week before I was dragged to a Ted Nugent show, they sure rocked it for a three piece band. It was a freebie, so I went. A few years ago I saw him and I have to say he had the worst sound I had ever heard, bar none. This time the sound was Ok.

These guys still draw big crowds here in Detroit, I'm sure in other parts of the country they wouldn't draw flies.

>TCBHey Brad...
I'm still using Paris. But, I also, use PT(HD,M-Powered), Nuendo.

Later this year, I will be re-building my Win 98 PC and insalling my 5 card
Paris rig on it..And, that PC will just be for Paris...

>Brad Lyons-SweetwaterHey Brad,

Good to see you around here again. I think I bought my rig from you (ECMM
at least). I sold it probably 2-3 years ago now.

I'm using Nuendo now - loving it for composing, sound design and post.

Regards,
Dedric

I'm still using Paris. I still have the cobbled-together Bundle II
you sold me, and I've added another EDS, three MEC's, 4 C16's, one
ADAT and 2 8iT cards over the years.

Next up is to pick up a third EDS and some more input cards.

It still does what I need - which is primarily tracking live off the
board during concerts, and then playing at being a mix engineer in my
spare time.

pabParis still works for me.

DCHello all,
I just purchased a M-audio ProFire to mary up with our Alesis HD24 & Adat
XT.(32 channels) analog ..go in into a 56 channel Sounrac Ghost..

Now. With this new little baby (ProFire) ..By addingn the Profire(via 32
channels) of Light pipe...then Firewire into the computer.. 32 channels of
direct mixng on the console!! Not to mention, 32 input channels to record!!.

I've been saying this for a while now, since M-Audio updated their converters
starting with their Audiophile 192 PCI card, their audio interfaces sound
wonderfull!

I knwo we have a lot of RME fans, including me..But, M-audio drivers and
now soudn quality are right up there with the best of them.. And, I've heard
and use the best..

To think this unit is only \$360.00!!!Bucks! Talk about price per performance.
Then, with any M-audio interface, you step into the Pro Tools world.

Great 3 way product..Pro Tools, VST, AU..Nice..Very Nice.. ANd Great driver
support..I've changed work flows somewhat, but I'm still using Paris as the final
editor and mixdown system. I can see advantages to other systems, but I think
there comes a time when you have to say "My gear does so much that I don't
need anything else".

If I was running a pro studio with clients it would be different I guess,
but given I'm

Welcome back and good to see you again here.
I'm still using Paris with two one card system's, one in Denmark and one
here in Norway. But I have bought Cubase SX2/3 some years ago, without
learning or using them at all and have now upgraded to version 4, where I've
just have started the learning curve. So, I think Paris will be faded more
and more out when "old me" have learned the basics with Cubase 4.But
who knows.....;-)

The first of the
rains arrived yesterday. It was great. The wind shifted and started blowing
from the south and all that moist warm air from Baja was sucked right up
into the valley here, collided with the cold air up in the mountains to the
north of us and we had a nice one. I can even see a little bit of snow on
the peaks up around 10,000' feet. Hopefully that will start happening every
afternoon until September. If it does, that would be a normal weather
pattern for this area.

While I'm considering switching to XP for the home studio to give me a
bit more flexibility in plugins and the ability to run a faster
processor, I'm sticking with the Mac for the mobile rig for that very
reason.

Knock on wood, I've been able to reliably track 16 tracks for 2 hours
on a 300MHz G3 for years. I love that.

pabStill using a mere 16 tracks of this ol' dinosaur. I'll probably be using
Paris till it breaks, or till I break, whichever comes first.

I like it. Am I hearing a bit of "Pomp and Circumstance" in the middle there?

pabyup. Before Zappa picked them up and through the first album. I've got a picture from high school somewhere of them all normal and in lettermen's jackets. How odd that looks

 OUTS/Returns
&&&&lightpipes=20
 not used in mixdown in this =
 example
&&&
&&&Quite a=20
 bit different routing scenario than the one you used=20
 for
&&&tracking, yes? I suspect what's happening is that =
 you're=20
 not
&&&saving your VST connections routing - if that's the =
 case,=20
 every
&&&time you open up a project it'll take you to the =
 last=20
 "saved"
&&&version, including any routing changes you've =
 made &=20
 saved,
&&&but NOT any routing changes you've made, but not=20
 saved!
&&&
&&&You can save these =
 routing/patching=20
 changes in one of two ways:
&&&
&&&1.) set up =
 all your=20
 routing for your patching & external EFX,
&&&and make =
 sure you=20
 save the project again once you do that
&&&(either under a =
 new=20
 project name or just overwrite what you've
&&&got... I tend =
 to save=20
 under a new name in case I fuck anything
&&&up - or simply =
 hate what=20
 I've done - and need to go back :)
&&&
&&&2.) =
 Save=20
 your routing scenarios in the "VST =
 Connections"
&&&dialogue... =20
 there's an option that let's you save those...
&&&you could =
 go=20
 from:
&&&"ScreamingOkapis-SongOfWorldPeace-BasicTrackRouting "=
 ,=20
 to...
&&&"ScreamingOkapis-SongOfWorldPeace-OverdubRoutingA ", =
 to...
&&&"ScreamingOkapis-SongOfWorldPeace-VocalOverdubs ",=20
 to...
&&&"ScreamingOkapis-SongOfWorldPeace-MixdownRoutingA ", =
 to...
&&&"ScreamingOkapis-SongOfWorldPeace-MixdownRoutingB "<B=
 R>&&&
&&&Now,=20
 it's true I have SX3 and you have C4, but I would bet =
 it's
&&&the=20
 same basic idea. Got it? Kewl?
&&&
&&&Let us =
 know if=20

you. Neil
wrote: Every time I close a project =
and then =
reopen it, various patches to my external gear are
