>

>If you use 24 bit audio files (I use 16 bit) then use 24 bit EMPTY files on  
tracks 15 and 16...

Now this 16-24 bit empty files thing makes sense.

Regards,

DimitriosYou can do the same for outboard Reverb like my beloved R-880

You just use the eds inserts for external on Tracks 15 and 16.

You get a 60 samples latency which is not big deal for reverb....

Regards,

Dimitrios

same thing just add the external

Dimitrios,

That's cool. I have to try it just to implement my hardware  
 in that way too.

Tom
