Ya Kim?

It didn't show up in my list of plugins by just running the .exe.

Tom

"Kim W" <no@way.com> wrote in message news:451285ec\$1@linux...

That's strange.

This one works for me as a vst unwrapped.=20

-----=_NextPart_000_0017_01C6DD63.EF87E800--Tom, check your sys info in the UAD performance meter. I'm guessing you have different versions of drivers conflicting.

They should all say 4.3

Also go to "My Computer/hardware/device manager/DSP accelerators/properties/Driver The Universal Audio UAD-1 DSP card driver version and the Powered Plugins Driver should both be 4.3.

Rod

Rod,
I thought they were but maybe not. All other things
4.3 are working. I'll check again. Thanks!
Tom

news:45129b1f\$1@linux...

Tom, check your sys info in the UAD performance meter. I'm guessing =
you have
different versions of drivers conflicting.

They should all say 4.3

Also go to "My Computer/hardware/device manager/DSP =
accelerators/properties/Driver

The Universal Audio UAD-1 DSP card driver version and the Powered =
Plugins

Driver should both be 4.3.

Rod

-----=_NextPart_000_0037_01C6DD67.6DA0E9F0--Hi, Tom.

I'm at a loss.

In the absense of a Steinberg/vstplugins folder, the install creates a folder in the Program Files directory called "solid state logic". It dumps the SSL LMC-1.dll there.

I just moved it, as you did , into my Paris VST plugins folder, and it showed up.

Are you sure you moved it to the very folder that Paris's config is pointing to?

I assume you are using XP.

So....

If someone wanted to pick apart a mix in a technical way.....

to see what techniques were used to create the mix...

using tricks such as reversing phase on one channel

to cancel all mono sources.....

what tools would one use?

what other tricks are there to perform?

thanks,

--=20

Brandon

-----=_NextPart_000_00A0_01C6DD87.EA3B5C00--Gary, I have used nothing but Seagates for 5+ years now.

No failures of any kind.

As far as noise, I don't know what the difference is between the 2, and I can't imagine it would be an issue with the drive inside a computer case or other enclosure.

If you want to be sure, go on their website and give them a call about it. They answer their phones and the phone support people are quite informed.

DC

>I think I'm pretty good at this. I built a box that does just what that plug
in I just posted for winamp does. You can break down the stereo image to
see what's going to what channel and also reverse phases to make sounds stand
out and hide so you can isolate better. Start with some old beatles songs
or anything with radical stereo and then compare with your desired source.

Listen carefully for relative levels of delay, reverb, chorus, tremelo, distortion
and how instrument textures contrast each other. Nasty distorted bass with
screaming guitar (Van Halen). Note pan positions and the soundstage that
is presented. I love the Rolling Stones "It's only Rock and Roll" (check
it out for sure), cuz it sounds like 2 guitars and there's like 4 or 5 all
over.

Use EQ to find the center frequency range of instruments to help isolate
them too by using high and low passes together to isolate the instrument
you want.

Of course this is all in headphones and the better they are the more you'll
hear. If anyone wants to send me a \$500 pair of headphones feel free. I'm
dying for a pair. hehe

>Well, I'm back to the fray and will not ditch Paris. Awfully glad this NG still exists. So, some questions: Will cloning your system drive lose the Paris reg/ilok or whatever the hell it is? Also, I've got a two card set up with a MEC and want to add my old Interface 442. Do

they have to be clocked to each other? I'm also looking for a friendly tech to help me work out a patch bay/routing scenario (I'm near Hollywood and this is not a request for a freebee). Oh, and are there any LA (or greater LA) folks mixing professionally on Paris these days?

Guess that'll do it for the time being. Thanks very much in advance.

All the best, JimOh, so you have an earliency problem?????????

;-)

be noticeably louder than the 7.2k brothers.

I wouldn't center and brand names too much. All drive makers have had good
and bad moments, though Maxtor certainly was the one who most recently got
a bad rap. I've been using mostly Seagate drives for a while, but when I've
seen deals on other brands I'll take them unless there is a really good reason
not to.

If your mobo has a RAID controller think about using it. There's nothing
quite as pleasant for a computer geek as a drive failing and it slowing workflow
down for twenty minutes with nearly zero chance of data loss.

Rod,
They were different and now they're both 4.3.
Wrapper ver 3.3 won't finish now. I get a
"Windows has encountered an error and is closing
the Wrapper." or something. It never finishes the task.
All my plugs are working except Pultec-Pro and SSL
Talk Back Comp. =20

I'm contacting UA on this one. I hope they treat me=20
better than Gene!

Rod,

I thought they were but maybe not. All other things
4.3 are working. I'll check again. Thanks!

Tom

"Rod Lincoln" <rlincoln@nodspam.kc.rr.com> wrote in message =
news:45129b1f\$1@linux...

Tom, check your sys info in the UAD performance meter. I'm guessing =
you have

different versions of drivers conflicting.

They should all say 4.3

Also go to "My Computer/hardware/device manager/DSP =
accelerators/properties/Driver

The Universal Audio UAD-1 DSP card driver version and the Powered =
Plugins

Driver should both be 4.3.

Rod

-----=_NextPart_000_0054_01C6DDDA.6C4136A0--Hello Dimitrios!

```

I bought my Paris v3 as a standalone and it is still in it's original CD jewel box case.
A simple white sticker on the case reads:

```

E-MU Paris Pro Key Number
  XX-XXXX-XXXX
Keep this number for future installation
  Paris authorization!

```

The license is written into the EULA. The above X's are all numbers, but yours appears to have ten alpha numeric key as well.

> EMU PN CDxxxxx does this mean anything at all ?

That is printed onto the CD itself and is only a Part Number.

From your description you look okay but the proof is when ID approves with a response code. Other than that, there was no fancy license sticker like what you might find on a MS product.

Regards,

El Miguel

1) Paris rocked.

2) Tried a LDC and even a SDC on toms and couldn't believe what I've =
been missing!

3) Found out the threads on my old SM7 are stripped and couldn't use it.

Just another day but it was a learning experience that was great.

I wish the horn players 'listened' more closely to their phrasing, =
intonation etc..

Kinda rough around the edges for a seven horn band. Playing things just
a little beyond their ability in some cases. It is jazz though.

The mixes will be work but fun.
Tom

Depends on which band you are speaking of. Some bands are helpful indeed.

sorry...

As far as manufacturers, there are significant failure-rate differences among them, in the experience of hard users in the editing world.

YMMV

My favorite tom mics are AKG 414 B-ULS - I've done quite a few sessions with these mics on various kits. I KNOW what you've been missing, since I don't personally own any 414's at this time.

No maxtors for me man. I order 7 GX620's with those and one died from = light business use of less than a year. I now have 8 more of them and = even Dell got wise to it and are putting seagates in them because the = failure rate was killin' them.

AA

"Tom Bruhl" <arpegio@comcast.net> wrote in message = news:4512d04f\$1@linux...

Gary,
The latest I've heard is that WDs had some issues a year or so ago but they are supposed to be fine now. I was told to get Seagates and had one die before it finished formatting last week. I don't = think the noise level is all that different from a 7200 vto a 10,000rpm.

I'm buying WDs again and see what gives. Some are even using Maxtors = again.

I know Chris Ludwig speced them into a system I will have him build.
Tom

silly question probably. Did you rescan with the wrapper after moving it =
there?

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:4512abbd@linux...

Kim,

Yes it's in the right folder. Everything else that's there works
except of course the Pultec-Pro... I'll try again.

Thanks!

Tom

"Kim W" <no@way.com> wrote in message news:4512a1f4\$1@linux...

Hi, Tom.

I'm at a loss.

In the absense of a Steinberg/vstplugins folder, the install creates =
a folder

in the Program Files directory called "solid state logic". It dumps =
the SSL

LMC-1.dll there.

I just moved it, as you did , into my Paris VST plugins folder,=20
and it showed up.

Are you sure you moved it to the very folder that Paris's config=20
is pointing to?

I assume you are using XP.

Kim

Many great points and many great posts. In the end, I decided on the =
 little 4x12 Marshall, got it home and immediately modified it for stereo =
 @ 4ohm :)

I haven't cranked it yet as I 'just' finished up and need more than 4 =
 hours sleep to handle the backend of THIS nightmare in the morning, so =
 it's off to bed.=20

Snags some pics along the way if anyone has any interest, I'll post 'em. =

Danke' all,=20

Aaron,

Yes indeed. Not sure but maybe I got a faulty download?

Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message =

silly question probably. Did you rescan with the wrapper after moving =
it there?

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:4512abbd@linux...

Kim,

Yes it's in the right folder. Everything else that's there works
except of course the Pultec-Pro... I'll try again.

Thanks!

Tom

"Kim W" <no@way.com> wrote in message news:4512a1f4\$1@linux...

Hi, Tom.

I'm at a loss.

In the absense of a Steinberg/vstplugins folder, the install =
creates a folder

in the Program Files directory called "solid state logic". It =
dumps the SSL

LMC-1.dll there.

I just moved it, as you did , into my Paris VST plugins folder,=20
and it showed up.

Are you sure you moved it to the very folder that Paris's config=20
is pointing to?

I assume you are using XP.

Kim

etty penny.
I'd consider a few more just to be able to get all of the toms with
the same sounding mic. I'd couldn't put my vocal 414EB TLII on
a tom in good conscience.

Do you mic the bottom head much? I never do but now wonder=20
what I'm missing there?
Tom
