/>

You should do an allmusic.com search on his name--there are 11 pages of credits (around 100/page) dating back to the 60's--I believe his first sessions were with the Crusaders....

>hey tom,

i use the same box for both the mac and the pc. from what i gather you're doing more than i am with the midi. i just have the one controller (pro 88) that i use in both logic and sx for the vstis and the m24 for logic though it can be used for either.

have you loaded in the sampler data crap...sorry i'm not at the puter now and i don't remember the what the option label is to add specific hardware for recognition.

" assign the output of my master keyboard>to Cubase, engage record and yet no note data is present when it's complete.???"

are you sure you have the right order in what is designated as in of out for...man i'm sorry. i'll have to go out to the studio to see which is which. like i said it's been a few months since i used sx. ...and since the other engineer hasn't been here to eff things up i haven't had to fix it.
