Thanks! This actually gave me some ideas for other means of making the PSCL more robust. I should be able to get started on the Scherzo next week.

Cheers!

Mike

Ok, this one is a pretty major change. I've been looking into the debug info when things go wrong, and I discovered that there was often a command failure, which means that the App sent the MEC a command, and it didn't respond. There is a function that is supposed to check for timeouts in command communication, and it always seemed a little sketchy to me.

So, I dug into it, and it was badly broken. It was supposed to wait for a reply, but it was only waiting for the PSCL actively waiting for a reply, which isn't the same thing at all. It's fixed.

I also found out why delaying the writes helps - it's the c16 that can't take being spoken to too quickly.

>transfer files? iTunes will git 'er done for you for free. Go into "preferences" and
find the "advanced" tab. Find the "import" sub-tab. Switch that to

"wav", OK it, close preferences. Now go back to your main screen and
select the file(s) and go to your "advanced" menu in the bar at the top
of the screen. Select "Convert to wav".

I don't know if it's header compatible, so you may have to run
StripWav, but give them a try "as is" and let us know how it goes.

Sorry Tom, I assumed someone would reply, I got nothing for you except
a vague recollection that this is a "hardware not found" thing. Sorry.

- KMs is going to take on Apple.
