is showing no signs of becoming less authoritative, except in the minds of the rabidly superstitious folks who comprise the American Taliban. One quick way is to delay the non processed (by aux's compression) copied drumtracks by 236 samples !

Almost 5ms nudge to the right.

The best way is to sample delay (I use the voxengo delay which is VST and does not have the 64 plugin limit) all remaining tracks by this amount.

Regards,
Dimitrios

ps: This is if compressor has 0ms lookahead.
