>;o) That is correct, but if you choose the BootIt 255 partition system, you then must choose which of those 255 partitions you can see for WinXP. You cannot use FDISK, but even when you use BootIT to do your partitions, it doesn't solve the fact that Windows is only programmed for having 4 partitions. Yes, you can HAVE lots of partitions, but you can't SEE them all at once. You can only see 4 from Windows. Hence you have to tell BootIT which 4 partitions you want to see depending upon which OS you are booting.

Cheers,
Kim.

Let me see, there's only one primary partition that can be set active with WinXP at once, so you shouldn't see any other primary partitions at all, the three others can then be logical partitions, just for working stuff like PAF's, waves, etc etc. When changing over to another active,
