Tom,

It looks like a "having a 442 in a multiMEC setup" issue. If removing =

the 442 and setting up things exactly as I described doesn't work, =
remove the third MEC (the one I sen you) and try your original =
configuration again. That MEC was working perfectly as MEC #3 in a x 4 =
MEC Paris rig before I tore it down. All I/O (including the clock I/O =
were functioning perfectly. You do have the MEC BNC outputs terminated =
with 75ohm caps, don't you?

Bill L wrote:

> I recently upgraded to C4 from SX1. I've been using Samplitude up 'til now, but got kind of fed up with certain Sam limitations.

>

> I am so impressed with C4 and it's capabilities. I love patching in outboard f/x with delay compensation. I actually dig many of the included f/x plugs and the Studio eq is not too shabby. I was just messing with the envelope shaper on a snare and could get a ton of control with it (trick I just found: when snare fills need more oomph, automate the release time and open it up for the fill - makes them big and ballsy).

>

> One of the reasons I switched away from Sam is it has a kind of incomplete or sloppy aspect to it. They add new features but don't complete or integrate them fully. C4 is totally the opposite - a very slick, pro bit o' kit.

>

> I'm contemplating something DJ will no doubt appreciate. There are some excellent f/x in Sam I would like to be able to patch into from C4, but they are proprietary. Can I run Sam on a separate machine and patch via the sends out thru ADAT LP into a channel in Sam with the f/x on it? I wonder if it senses the actual delay or just computes it from the driver latency settings? If it just computes it will not compensate for the delay into and out of the Sam machine's sound card. When I get time to install sam on the other machine I'll check it out.

>

> If you are looking for a really excellent, mature and robust DAW I do recommend C4.What is you motherboard. You have 3 eds cards? IRQ conflicts are the biggest problem. Make sure you don't have conflicts which is damn hard with 3 cards. You may need a magma for that many cards. I think used they are \$250 or so.

I purchase a pair of Neumann KM84i's on EBay. Seller uses the following =
language in his ad.....

It is in very good working condition it is missing the purple neumann =
shield on the microphone it has some minor ware and tare a few light =
scratches on it as well over all i would give it an 8 out of 10=20
I plugged it in with Phantom power it works and sounds great=20

i will offer a refund only if microphone is damaged during shipping=20

Shipping insurance is recomended=20

this item will be sold as is and will not arrive D.O.A.

Seller offers to hship them to me for \$10.00. I tell him no, and provide =
him with my UPS account number and tell him to ship them 2nd day, =
insured for \$3000.00, which he does. For some reason, they arrive late, =
(the evening of June 28th) but the package is completely intact and =
shows no signs of damage or mishandling.

I put them up on stands and conncet them to my Great river preamp. the =
output of one if them is a bit low initially, but comes back up to an =
acceptable level after a minute. I leave them up for about 45 minutes to =
get a burn in and they appear to function normally.

The next day I do the same. Output level of same mic is a bit low, but =
stabilizes. I use them for a little while, then put them away. I leave =
the seller positive feedback because I am willing to concede that an =
old mic like this may need to get the circuitry warmed up in order to =
stabilize.

Sunday, July 2nd, I have a picker come over to do some tracking. I put =

the mics up and start tracking. The same mic that I thought needed to = stabilize drops in level to the point it is unusable, making quite a bit = of racket as it dies.

I call "a well known expert" (I'm keeping names out of this) on Monday = and under his guidance, I remove the capsule of the mic that died. then = I remove the capsule of the mic that works. the connecting pin from the = capsule assembly to the amp of the bad mic is physically broken off in = the back of the capsule assembly. When the capsule is screwed on to the = amp, there is barely enough current flowing between the broken pin = pieces to provide some signal, though not enough to be usable. I have = attached pictures.

At this point I called yet another well respected expert who services = these mics for an opinion and was told that he had a backlog until late = 2008 but that Neumann could probably fix this issue. I boxed up both = mics, called Neumann, talked to their tech support, got an RA# and = shipped the mics on Monday PM.

I then called PayPal and described the problem. They stated that their = policy is that no matter how a seller represents an item, if he accepts = Payment by PayPal, he is subject to the PP 45 day = complaint/arbitration/refund policy (I guess this may be why people who = sell very expensive old "vintage" mics, don't accept PayPal. The support = guy also advised me to go ahead and submit a complaint so that this = could be handled properly.

I thought about this and then e-mailed the seller through EBay with a = brief description of what had happened. I didn't hear back from him for = a few hours. I decided to file the complaint (the seller thinks a little = prematurely) because I'm extremely busy and don't have the time to jack = around with waiting for some dude who probably is going to tell me that = I bought these "as is:" so he's not going to do jack ****. Judging by = the language in his ad, he is obvious intent is to sell a used mic and = then deny responsibility for it's condition because "this item will be = sold as is and will not arrive D.O.A" because " I plugged it in with = Phantom power it works and sounds great"

Since I paid for both mics at once, Paypal gave this a single = transaction # and has frozen the payment for both mics. I clearly told = him (when he replied to my complaint) and to PayPal (when I made the = complaint) that my problem was with only one of the mics. I will be fine = with releasing the funds to him for the working mic, but I have not yet = received a reply from him to my reply *to* his reply to my reply (sigh).

I have asked him to pay for the repair or give me a full refund for the = mic if the capsule is not repairable. I am also willing to abide by the = opinion of the folks at Neumann as to the condition of the mic. I think =

I have a reasonable expectation to have a functional mic and I think the sellers attempt to have it both ways by stating that the mic works, but "if it doesn't", anyone who buys it is screwed. IMO, a seller has to have responsibility to have his products serviced and confirmed to be in good working order, or be willing to abide by the rules of the game if he accepts Payment by PayPal. that's part of the beauty of PayPal..Seller gets his money immediately.....buyer has recourse if he gets screwed on. Am I being an asshole here?

 <P>Sunday, July 2nd, I have a picker come =
 over to do=20
 some tracking. I put the mics up and start tracking. The same mic that I =
 thought=20
 needed to stabilize drops in level to the point it is unusable, making =
 quite a=20
 bit of racket as it dies.</P>
 <P>I call "a well known expert" (I'm keeping =
 names out=20
 of this) on Monday and under his guidance, I remove the capsule of the =
 mic that=20
 died. then I remove the capsule of the mic that works. the connecting =
 pin from=20
 the capsule assembly to the amp of the bad mic is physically broken off =
 in the=20
 back of the capsule assembly. When the capsulle is screwed on to the =
 amp, there=20
 is barely enough current flowing between the broken pin pieces to =
 provide some=20
 signal, though not enough to be usable. I have attached =
 pictures.</P>
 <P>At this point I called yet another well =
 respected=20
 expert who services these mics for an opinion and was told that he had a =
 backlog=20

until late 2008 but that Neumann could probably fix this issue. I boxed =
up both=20
mics, called Neumann, talked to their tech support, got an RA# and =
shipped the=20
mics on Monday PM.</P>
<P>I then called PayPal and described the =
problem. They=20
stated that their policy is that no matter how a seller represents an =
item, if=20
he accepts Payment by PayPal, he is subject to the PP 45 day=20
complaint/arbitration/refund policy (I guess this may be why people who =
sell=20
very expensive old "vintage" mics, don't accept PayPal. The support guy =
also=20
advised me to go ahead and submit a complaint so that this could be =
handled=20
properly.</P>
<P>I thought about this and then e-mailed =
the seller=20
through EBay with a brief description of what had happened. I didn't =
hear back=20
from him for a few hours. I decided to file the complaint (the seller=20
thinks a little prematurely) because I'm extremely busy and don't =
have the=20
time to jack around with waiting for some dude who probably is going to =
tell me=20
that I bought these "as is:" so he's not going to do jack ****. Judging =
by the=20
language in his ad, he is obvious intent is to sell a used mic and then =
deny=20
responsibility for it's condition because "this item will be sold as =
is and=20
will not arrive D.O.A" because " I plugged it in =
with=20
Phantom power it works and sounds great"</P>
<P>Since I paid for both mics at once, =
Paypal gave=20
this a single transaction # and has frozen the payment for both =
mics. I=20
clearly told him (when he replied to my complaint) and to PayPal (when I =
made=20
the complaint) that my problem was with only one of the mics. I will be =
fine=20
with releasing the funds to him for the working mic, but I have not yet =
received=20
a reply from him to my reply *to* his reply to my reply =
(sigh).</P>
<P>I have asked him to pay for =

the repair or=20
give me a full refund for the mic if the capsule is not repairable. II =
am also=20
willing to abide by the opinion of the folks at Neumann as to the =
condition of=20
the mic. I think I have a reasonable expectation to have a functional =
mic and I=20
think the sellers attempts to have it both ways by stating that the mic =
works,=20
but "if it doesn't", anyone who buys it is screwed. IMO, a seller =
has to=20
responsibility to have his products serviced and confirmed to be in =
good=20
working order, or be willing abide by the rules of the game if he =
accepts=20
Payment by PayPal. that's part of the beauty of PayPal..Seller =
gets his=20
money immediately.....buyer has recourse if he gets crapped on. Am I =
being an=20
asshole here?</P></DIV></DIV></BODY></HTML>

BTW, I tried the "good" capsule assembly with both mic amps and both =
amps are working properly. There is a tiny bit of the broking off =
threaded pin sticking out of the back of the capsule assmebly s maybe, =
with the tools available to the the mic techs at Neumann, they can get =
some purchase on this and unscrew it, replace the pin, reglue both pins =
to the respective capsule assemblies (as they should be) and we'll be =
done.....hopefully. these mics sound really good and I'm hoping upon =
hope that the capsule isn't damaged. they ain't making them anymore.

"DJ" <animix _ at _ animas _ dot _ net> wrote in message =
news:468bf398@linux...

I purchase a pair of Neumann KM84i's on EBay. Seller uses the =
following language in his ad.....

It is in very good working condition it is missing the purple neumann =
shield on the microphone it has some minor ware and tare a few light =
scratches on it as well over all i would give it an 8 out of 10=20

I plugged it in with Phantom power it works and sounds great=20

i will offer a refund only if microphone is damaged during shipping=20

Shipping insurance is recomended=20

this item will be sold as is and will not arrive D.O.A.

Seller offers to hship them to me for \$10.00. I tell him no, and =
provide him with my UPS account number and tell him to ship them 2nd =
day, insured for \$3000.00, which he does. For some reason, they arrive =
late, (the evening of June 28th) but the package is completely intact =
and shows no signs of damage or mishandling.

I put them up on stands and conncet them to my Great river preamp. the =
output of one if them is a bit low initially, but comes back up to an =
acceptable level after a minute. I leave them up for about 45 minutes to =
get a burn in and they appear to function normally.

The next day I do the same. Output level of same mic is a bit low, but =
stabilizes. I use them for a little while, then put them away. I leave =
the seller positive feedback because I am willing to concede that an =

old mic like this may need to get the circuitry warmed up in order to = stabilize.

Sunday, July 2nd, I have a picker come over to do some tracking. I put = the mics up and start tracking. The same mic that I thought needed to = stabilize drops in level to the point it is unusable, making quite a bit = of racket as it dies.

I call "a well known expert" (I'm keeping names out of this) on Monday = and under his guidance, I remove the capsule of the mic that died. then = I remove the capsule of the mic that works. the connecting pin from the = capsule assembly to the amp of the bad mic is physically broken off in = the back of the capsule assembly. When the capsule is screwed on to the = amp, there is barely enough current flowing between the broken pin = pieces to provide some signal, though not enough to be usable. I have = attached pictures.

At this point I called yet another well respected expert who services = these mics for an opinion and was told that he had a backlog until late = 2008 but that Neumann could probably fix this issue. I boxed up both = mics, called Neumann, talked to their tech support, got an RA# and = shipped the mics on Monday PM.

I then called PayPal and described the problem. They stated that their = policy is that no matter how a seller represents an item, if he accepts = Payment by PayPal, he is subject to the PP 45 day = complaint/arbitration/refund policy (I guess this may be why people who = sell very expensive old "vintage" mics, don't accept PayPal. The support = guy also advised me to go ahead and submit a complaint so that this = could be handled properly.

I thought about this and then e-mailed the seller through EBay with a = brief description of what had happened. I didn't hear back from him for = a few hours. I decided to file the complaint (the seller thinks a little = prematurely) because I'm extremely busy and don't have the time to jack = around with waiting for some dude who probably is going to tell me that = I bought these "as is:" so he's not going to do jack ****. Judging by = the language in his ad, he is obvious intent is to sell a used mic and = then deny responsibility for it's condition because "this item will be = sold as is and will not arrive D.O.A" because " I plugged it in with = Phantom power it works and sounds great"

Since I paid for both mics at once, Paypal gave this a single = transaction # and has frozen the payment for both mics. I clearly told = him (when he replied to my complaint) and to PayPal (when I made the = complaint) that my problem was with only one of the mics. I will be fine = with releasing the funds to him for the working mic, but I have not yet = received a reply from him to my reply *to* his reply to my reply (sigh).

I have asked him to pay for the repair or give me a full refund for the mic if the capsule is not repairable. I am also willing to abide by the opinion of the folks at Neumann as to the condition of the mic. I think I have a reasonable expectation to have a functional mic and I think the seller's attempts to have it both ways by stating that the mic works, but "if it doesn't", anyone who buys it is screwed. IMO, a seller has a responsibility to have his products serviced and confirmed to be in good working order, or be willing to abide by the rules of the game if he accepts Payment by PayPal. That's part of the beauty of PayPal.. Seller gets his money immediately.....buyer has recourse if he gets screwed on. Am I being an asshole here?
