>Telefunken NOS. the very best. I have also tried the new
Electro Harmonix 12AX7's and found them to be way better than
any other new-production tube. Really amazing tube.

www.tubesandmore.com/

has them for 8.95

They have a bunch of choices in 12AU7 including a Mullard for
44 bucks. Pretty reasonable price, but I don't know how it will
work in your mic.

Tube Depot has a good selection as well

<http://store.tubedepot.com/12au7.html>

I have not used any of these in a mic, but there are a lot of good choices.

BTW, eBay has lots of used and NOS Telefunksens going for less than the tube dealers. Look for the <> diamond on the bottom.

If you are willing to spend the dough, they are the best, but those new EH are actually pretty close, and cheap.

Which model do you recommend, and what have your experiences with this mobo been? Is it relatively trouble-free with paris XP?
Thanks for any comments.

>Yes, it can be that kind of problem, I know it too well from old Win98 days but had forgot all about it. Win 98 often didn't uninstall old drivers when installing new hardware, so it have to be done manually in Safe Mode. When you're first in Safe Mode, it can be a good idea to control if there's more doubleshit installed.
