>Sorry to hear that. I hung out with him and Jeff Baxter at the last Paris
NAMM show. Stephen was showing Jeff and I his scars from his motor cycle
accident and when he was shot up while working with the FBI. He said, that
was what delayed him from writing the Paris GUI on time for Paris 3.0. Jeff
showed me his Orange County Sheriffs badge. It was interesting hearing about
their law enforcement adventures. Stephen and I talked about aviation, He
was a pilot in the Swedish military and flew the SAAB fighter, and he said
he checked out on the F 16. I was telling him that my guitar player from
high school was an F-16 jock at Selfridge Air base. He's the the guy that
hires pilots over there.

Stephen was an interesting guy, we always hit it off well. Hope this is
some how misinformation, but if it's not, fair well and RIP SSC.

Re: Cubase not initializing properly...

Pull the PCI card for the Multiface & check to see what version it is... it's printed in the upper right-hand portion of the circuit board (as you're holding the components facing you, with the port on the left-hand side); if it's anything lower than v1.7, that might be your problem. If it is, lower than 1.7, you can get a factory refurb, tested & ready to rock, for \$40 from Synthax.

I was running a version 1.4 card forever without any problems, and then with my new mobo & WinXP SP2 it didn't want to play nice anymore... a version 1.7 card took care of it.

Let me know if that's the case, and I can hook you up with the right people at Synthax to get yours swapped ut.

His legacy lives throught he music that is made on Paris and all the other projects he has been involved in over his lifetime

Peace, jasonHi Don,

Check out the free system scanner at www.bitdefender.com.

It's probably one of the best out there.

Good luck.

Mark

I'd max it out if I were you. Also, you might want to also consider
MOTU's Digital Performer. It has a few more features for writing music
for picture although Logic will also work.

Cheers,
-Jamie
