[illegible]

---=_linux48986d24--Man, this is getting very exciting. The rig is sitting here, and I do have an old blue/white Mac G3 to throw it into, but that doesn't get me any closer to testing this; I still have to wait to build my XP rig.

I'm not aware of the bugs surrounding the C16 and multiple CPUs, but will these developments effectively mean that I could have an increased range of PCs to potentially install PARIS onto?

- Kerry

> [Image]They guy who does the classical recording for the Yale school of music has the main performance hall wired up with probably 8-10 pairs of small capsule condensers he uses in various combinations depending on the source. Schoeps and DPA are the most popular brands, though I suspect you could get 95% of the performance for a lot less money with Earthworks and others.
