>>I'm using two computers here running Steinberg systemlink (slave and master)
All of my audio files are on an SATA drive on my master comp. these
computers are networked using gigabit LAN on a two gigabyte GA-K8NS Ultra
939 Mobos. Each of these mobos has a Marvell Gigabit Lan connector 10/1000
and a NForce 10/100 LAN connector. both connectors on both mobos are routed
through a Gigabit switch.

OK, so I open up a project on the slave DAW, name it and then go to import
files. I navigate to the HD on the Master DAW and import the files from the
Audio folder on the master DAW to the project on the slave DAW. I do not
click the option to copy the files to the working directory of the project
on the slave DAW. when I hit OK, these files are imported to the slave

sues over the network between the master and slave DAW.

I haven't yet tried to record audio from the slave DAW to the HD on the
master DAW, but if it works, this basically means I can record to and store
all my audio files on a couple of monster SATA drives on the master DAW and
using Systemlink, just record to AD's on any computer I choose with the
target audio directory being on the Master DAW.Samples can be streamed from
VSTi's and sample dri

Nuendo "feature"?...Well,
>nonetheless, I'm doing it.

No, it's a hardware thang, not Cubase-Nuendo thing... in fact,
it's in the Multiface manual - remember we were talking about
this once over the phone? And I also posted the info here once

for somebody else a few months back. I've tested it, but personally I haven't had to do it yet on an actual session because I run the stuff through my 2nd Multiface that I don't need t

for figuring it out though! If you need 576 inputs to all be routed through the headphones, now you can do it!

:D lol

Actually, How many inputs are youse guys all using for full band tracking? I've got 16 analog & 8 lightpipe (plus 2 stereo SPDIF that are useless to me since I have no preamps with a SPDIF output), and I've yet to use all of 'em at once, and I always have at least two bass signal & at least two mics on each guitar & sometimes a scratch vox. Now in the case of
