It works with great.Plugs are uad 3.8 and waves gold 3.2

I haven't used osx 10.0 on the second partition but it

was suggested i update osx and install logic,peak and utilise

it in osx.Logic and peak are interfaced with a Motu 2408 mk3

424 pci card.

Will this update work without adverse effects on my paris/os9

which i will mostly use on an upcoming project?Actually I think we ought to invite any who want citizenship and can

speak some English to take an IQ and an aptitude test. Any with an IQ

over 120 and a good aptitude score, if they have a clean legal record

and a record of steady employment, should be offered citizenship. The

rest should be refused citizenship and should be sent back. We can use

more able, intelligent people. Who says we should not pick the top

applicants just like a company does. That's how we can make our country

stronger.

Maybe we should offer Mexico to swap 1 of our dummies for 2 of their smart ones. That seems like a darn good deal to me.

I've been playing around with it today, comparing it to different combos =

Thank you!Hey Neil..I haer ya and you are right about proper digital mixing..

I really don't like mixing that way, so I sum thru an analog mixer and let
it do he job..Slamming into a Alesis Masterlink..
