at's not even counting  
plugins, which are unGAWDly expensive for PT due to the TDM  
licensing fees that developers have to pay to Digi. I've  
probably got less than 1,500 bucks invested in plugins, and  
i've got dozens upon dozens of them because there's so much  
freeware VST development going on - i'm sure i'd be looking at  
another ten grand, minimum, if I were to try & assemble a  
comparable TDM plugin arsenal. So there's \$30k for PTHD & plugs  
right there. No way have I spent even a quarter of that on every  
Native rig, plugin, and upgrade chase since I've been doing this  
stuff!

Neil
