ller unless I would undo from the editor first and then the undo light would come on and I could continue, no big deal. The other problem was that I would open a prj and there would be no audio for 15-30 sec. not a big deal either. But sometimes after audio would come in upon playback audio would drop out and I would wait for minute or so and continue with no problem as long as I did not close the prj and reopen. Several ago the computer started crashing and I would get the exception error, no time to hit ctrl-s it would go to a black screen and reboot. So, I decided to check the connections on eds card and reseal them and paid close attention to the interface cables on the eds cards upon launching Paris the message that the eds card were not hooked up corre
