so it's no longer practical for me to keep.

I'm in North / Central Florida (Gainesville). If you happen to be in the Atlanta area, I'll be driving up for work on Wednesday so I can pack it up and bring it.

Feel free to email if you have any questions.

Thank you,

-eHi,

I'm just looking to purchase a set of jumper cables to connect a 3rd EDS-1000 card to my Paris set-up. I am hoping that someone out there will be able to offer this to me at a reasonable price, or give me some pointers about where I can search this part out.

Thanks in advance to anyone who can help me out.

-DavidDavid,

I picked mine up from Morgan at East coast Music. A little spendy, but they worked right the first time.

Hoov

> I have the following complete system for sale, perfect working order:

Sorry but I forgot to mention I do have the software license for 3.0 and will be happy to assist the transfer, however it is that it's done.

-elf you have access to old computer parts, you'd probably find the connectors you need, little 16 pins I believe. I made a couple last year using parallel port expansion brds from inside a few old 486s, just cut the cables and added the connector on the other end, worked fine.
