Aaron,
I should have mentioned this started happening after I installed the
newer (but not Mikes yet) Paris effects. The FreQ or modulation bundle=20
don't show up either. They're probably one of the problem here.

Tom

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:4720b46a@linux...

Hey Aaron,
This is a clean install or so I thought. Should I try to replace the =
files
it's looking for or do I need to do a complete reinstall? No Pace.

Today's the day.
Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message =
news:4720412a@linux...

This sounds like you have a bad/corrupt set of files to me. Did you =
try another installer?

Also, if you still have 2.1 or 2.2, have you tried that as well?
If you pulled this from an image (ghost, acronis, PING, etc...) I'd =
bet on a bad image. If not, I'd bet on bad installer. Either way, I =
think you're fooling with corrupted files.

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =

news:47203fcd@linux...

Hey everyone,

I am functional but barely right now. One 442 with no SPDIF is no =
bargain...

Major problems with newest install and computer:

At Paris start up it says: StockFx.dll not found twice.

It also says: mod3a.dll in system32 folder not a valid Windows =
image.

I think I should just remove the mod3a.dll from the system32 =
folder right?

StockFx.dll should have been part of the Paris install right? =
Where

can I find it and where does it go? Paris Pro folder?

Paris also works smoothly except two of the three C-16s won't work =
entirely right.

I tried to get them all working in classic mode but the =
configuration is never saved.

It remains C-16 1 is Classic and 2 & 3 are Pro mode.

I saved the project before resarting though. Hmmm? Everything =
else seems to save ok.

The audio on card B never works. I have to assign Submix 2 to =
Card C. I've tried two cards

with the same results. I'll try another. Paris closes fine but a =
Windows error comes up and=20

asks if I want to send it to their sorry asses everytime. No BSOD =
though.

Lots of nutty stuff here but at least it kinda works.

Any tips would be great at this time. I have two days to get in =
tip top shape for

real work. I wish I knew more.

Thank
