I'm trying to avoid drivers at all costs.  
Midi in/out sounds far more stable to me.  
I want a stand alone box.

USB/MIDI =3D Extra unknown sysex data  
Computer crashes  
Smoked hardware  
Midi Communication loss  
7 days of lost revenue

or is that just Motu?

Hi Tom,

The would shoot for the M-Audio or Edirol. The Emagic PC driver=20  
development/support is non existent.

Chris
