for my home hi-fi system. When I called Aragorn to ask about upgrading it, they said it was one of the first amps they made and that it didn't even have a serial number or model number yet. They remembered it and Dean though. It is so smooth sounding.

Dean was also a neighbor of mine for some years before they moved about 15minutes away. Great guy. I think about him often and am still shocked!

Lou

in to a backup system and had no clicks).
I know about problems with the eds cards and a lack of power/too much heat.
But I haven't changed anything in my system. And it is only a problem on
three out of 9 tracks.heat and power supply

Steve L. wrote:What if you import the tracks into a new project?

While there has been a long time since something was ever developed for Paris,
I believe your plugz were the last right ?, isn't it about time to blow a
new breeze by releasing this reverb you were talking about ?
We cannot wait for this good fellow to make his appearance forever, right?
This will be a nice thing to keep us playing with Paris.

I commit myself in paying for it if this guy will some day appear and ask something for it as I am sure a

Il of us who will download it will agree with that !

Will you relase it for us poor vintage Paris users ?

Regards,
Dimitrios

Although that's the same link twice.

Jeez, Deej. Ain't senility a bitch.

If I can't bend Asus to my will, I'll snatch one of those, probably.

> True story: I was all alone at home at Chrsitmas-time, years ago, late teens. I was reading on my couch, and leaned over casually to let one rip. Totally routine, just a young feller passing a little gas.

But it came out as a pure tone, just as sweet as a trumpet note, no audible distortion, just pure sweet tone. Nobody was there to hear it, but I laughed

hysterically, of course.

Sorry for that.

Jimmy

If you are recording and your computer is close to 100% CPU power the
simple checking the cdrom drive can cause clicks and pops at regular
intervals...Also if a hard drive is sharing an IDE channel with a cdrom
and it checks for a cd in the drive then that hard drive cannot be accessed
