replace unfixable Event 20/20bas
monitors with ASP6s. So now I have two extras!

They're still in the factory cartons -- never been opened. Street price \$1000/pair.
Asking \$900/obo.

Email (removing the pretty obvious bits of that screwy domain name I put)
or call 415-613-1405.

Thanks for looking.

's. I've also got a pair of the original RE 7393 PC
transformers that were replaced by two of the four Jensens that I will throw
in to the pot so for \$550.00 you're getting 8 x 1:1 balancing transformers
mounted in a single U rack and another pair that you can use in a project
box if you're into that sorta' thing. I may be able to help. Email me privately.

all. Really nice mics folks, big condenser sound with almost zero hype on the top end.

photo. The computer interface is still in the wrapper, as is the card. I used to own a store, brought this home to fiddle with, but, never got around to unpacking it. There is a big fan base for this and I'd like to see it go to an enthusiast as opposed to a reseller. So, if you're a Paris fan I've got one in a box (well, two boxes to be exact). Discs, cables etc still in plastic. I will be posting this soon on Craigs List so if interested write back right away. terryHi Dennis, I have emailed you trying to see if this email is the correct one cause it seems so funny ! I did not get any response and no bounce back still... Let me know if this atari thing is your original email.

Regards,
Dimitrios
