submix behaves wrongly.

It plays first and then after pressing stop it does not play anymore until

I hit the solo inside editor and it plays until I hit stop again.

Spdif out now works !

Cheers,

Dimitrios

>MikeThanks for the report, Demitrios! I'm going to fix up the Scherzo and see
if that clears up what's left. I only have a two card system, so your testing
is really helpful.

Thanks again!

>Hi Rob. Those presets are a quick Version One. Once I have the new workspace set up in January I should be able to hear to work properly, and some friends who are engineers are going to help me out in preset building. Should be fun and useful.

If you feel motivated to share your own presets as you develop them, it would be extremely valuable - I'd fold them into the templates I'll be generating and serve them on the Wiki.

That was AWSOME! it totally failed to suck, and was so great and mouth watering
I felt saliva starting to dribble down my chin!

Seriously, I was really impressed. There's no reason you shouldn't have an
online thing going. Thanks for posting that stuff, it kind of inspires me
to get a web presence up for the same thing.

I'm not as into working on my PARIS rig as I should be. Given a free moment I'll always grab a guitar before I'll put time into PARIS. I had the Tankersley video for years before I finally watched it. I'm lazy.

I had Chuck's effects pluggins for years too and just installed them because I needed a flanger on a song that I was recording. I think I'm going to buy some of the plugs that Mike is writing. Sounds like people are liking the reverbs.

>From what I've heard, and from your online presence here, you'd be a natural for it. All the ingredients are in place, and if your main infrastructure costs (recording facility and hardware and instruments

etc) have already been absorbed, then the expenses needed to take it a step further are trivial. It's mostly a time investment if you're web-handly (if not, the market for web development's pretty competitive nowadays) and from a business perspective the potential leverage it can add to those previous investments is just phenomenal.

On a related side note - looking at this thread, I can't help but think that a "PARIS collaborative project" might be a fun thing to take another stab at some day. There's a formidable talent pool here.

[hehehe - I just had an image of a twisted-21st-century-update cover of "See it My Way" as well and laughed :D]
