I have here. It's not just me either. Others have reported this with Cubase
4. I do agree that (other than my few "issues") it's a dream program and is
one of the main reasons I decided that it was time to learn a new DAW. Don't
count on a lot of support from the cubase.net forum. This place is more
useful than the Cubase user's group for Cubase problems because Neil and
John are here.

;o)

>>You're not an A hole - more like a G# hole. No, you're in the right. The
mic is broken, duh.

My advice for next time: if a guy spells that poorly he probably has no
idea if a mic is in "very good working condition".

Whether you are one or not, I defer to the famous Warren Buffet line, 'If
you sit down at the poker table and after 30 minutes don't know who the patsy
is, you're the patsy.'

;-)

 We agree to disagree. But doesn't Boston seem a bit, I guess 'contrived'
 is the best word? And I don't mean 'predictable' or 'well executed,' I like
 music made by machines after all. But doesn't More Than a Feeling actually
 have Less Than a Feeling because it's trying so very hard to have Feeling
 but ends up so buffed and perfect it's antiseptic?

>I actually admire Scholtz for a number of reasons. He sued his sweat shop record label (with money made from his electronics) and won. He designed some really cool guitar gear, I still wish I had my Rockman chorus module. Also, as you say, a bright and thoughtful guy when interviewed. But I just can't hang with the music.

Unrelated question, Don. As a guitar geek. My Fulltone OCD was stolen at a gig recently. I'm playing these days through a two amp rig, a Top Hat AC-15 knockoff with a power soak on it and a Savage Macht 6. I've kind of decided the OCD was a little too pretty for me. Great pedal but just not enough grit. I'm thinking of a Fulltone 70 pedal or a Soul Bender, so more of a true fuzz sound than an overdrive. Good idea? Bad idea? Alternative idea?

Then you probably don't like works of art such as Michelangelo's sculptures, either, right? Too perfect & well-executed, after all.

Neill especially like the part where he applies phnntom power and calls it good. This was a sequentially numbered pair out of a lot of 5. I haven't seen feedback from the other buyers yet. I will say that this pair of mics reproduces a signal (or at least *reproduced*) a much truer replication of the original signal than any instrument mic I've ever heard, though I admittedly haven't heard them all.

;o)

>I guess I view stuff like Boston, Steely Dan, Toy Matinee, etc., as skillfully-crafted works - they're deliberate in so many aspects, and it's that which takes you to where they want you to go... I mean, there's a whole world in Aja - just listen to it open-mindedly sometime. Same goes for the first Boston album (sorry, I don't even give them a pass on "Don't Look Back" - it's ok, but nothing like the first one).

If guys like Fagen & Scholz would've wanted to produce raw emotion & slightly out-of-tune chording, they certainly could have. Scholz's problem is that he couldn't sustain the vision very long.

Neil
