DCHow do you get Internet but no local networking?

With Cubase, did you set XP process to background services priority as in the manual?also, can you run updates to keep it secure ?Hi Tom, I have posted this already on the graphics post I made but in case you did not catch it here it is again...

Hi Tom,  
My emails still bounce back so I will use this forum to reply to your questions  
!

Hi !!  
I hope that you are well with your foot !  
Regarding your questions all are positive !  
Yes sample accuraccy there.  
No pci extra just the synplate added to scope card.  
Use ASIO2 protocol under cubase.  
By starting Paris Cubase follows sample accurate.  
Let me know if you need more detailed instructions as how to do this !  
Regards,  
DimitriosGreat news Mike, keep us posted.

>Hey Dimitrios,

So you are saying that with Paris in XP the sync plate will allow Cubase to chase Paris sample accurate?

I have been using SMPTE in Paris to MTC in the past.

Will I still need to do this while using an external WC?

I'm ready for detailed instructions if this is possible!

Thanks D,

Tom
