is.

Then start reinstalling 98 later tonight or tomorrow.

I've rebooted so many time I feel violated. Worn out.

Plus I have a gig at 8 pm EST and I'm not sure how much I can pull off before I leave.

This will all seem doable after I finish the backup.

Thanks again!

Don't let the gamer graphics on the box fool you. They're a superb company making gear that can go from frighteningly stable to hugely overclocked no problem.

Glad you caught that one man, are you running an old version of
Roxio/Adaptec per chance?
