>There is a guy in Europe that wants to buy one of my domain names. He has contacted me via phone and Email. I basically told him to make me an offer.

He has had a broker contact me via email and we've negotiated a price(in the thousands). They want to use an escrow service. I'm going to tell them no, to wire me the money and I'll do the transfer. I know from experience, this is where the whole deal will break down. Any suggestions?Are escrow services bad ?You saying you got redirected? heheYeah seem s like a lame hybrid between Live and garage band.

You would they would just maybe add this extra stuff to Cubendo and be done with it.

in the 1970's the same people were squealing
about global cooling. Worse, the ice core evidence shows
that increases in carbon dioxide level historically follows warming
not precedes it. Carbon may not be the problem.

>I'm not about to get into an argument about Global warming...but I do
remember my Grade 10 science and the chemical make up of the atmosphere and
from that perspective alone Global Warming being caused by CO2 doesn't make
any sense and it makes even less sense when you use the numbers the IPCC
uses to prove that CO2 emissions are the cause...bad science...plain and
simple.

On the otherhand, I reduce, reuse and recycle and have spent thousands of
dollars making my home energy efficient and drive as clean and efficient a
car as I can afford...I'm doing my part and will continue to due so...but
not because of scare tactics and bullshit science but because it's the smart
thing to do.
