Guess not, for Apple anyway. This is old news. Processors, onboard graphics chipsets on the low end, and, heck, doesn't Intel do the entire motherboard now? So now, what were you complaining about?

I have a laptop using and RME multiface for composition stuff. Setup Acid for loops running through Rewire into Cubase. Been really stable so far.

As far as brands of laptops go my experience is with the Dells and toshibas. Placed over 100 Dell laptops (mostly latitudes) and they have been EXTREMELY reliable. I've personally had three toshibas in a row and have been pleasantly surprised with their reliability/ performance. Macs are noe an option because you would have the best of both worlds.

With the Dells,

I can only remember maybe 2 or 3 service calls. One of my customers is still using a Pentium 133 Latitude! If you go consumer channel (HP Compaq Toshiba) I would definitely get a three year onsite warranty. If something goes wrong, you won't find the parts at the corner "geeks are us".

If you want more info on recommendations PM me and

as a slave for the session...it must

>be able to...mustn't it?

Martin - I'm not sure if it can, but if not, one of these should do it for you:

<http://www.sweetwater.com/store/detail/MTPAVUSB/>

Neill used to read liner notes like my dad read the newspaper over morning coffee -in my case OJ. I was most familiar with his work through my infatuation of Joni, and struggles to emulate JT. I picked up the tenor sax, briefly, in part because of him. And I recall singing along with his lines, like they were vocal parts. Sad sad news.

MR.

> Even when you know it's coming, it's very sad...

>

> <http://abcnews.go.com/Entertainment/wireStory?id=2793408>Hey DJ, I don't have any thoughts on the laptop, but I wanted to send a shout out as you get back to playing. I've been writing right along -but mostly electronic stuff. After talking about getting back into the singer-songwriter gig for quite awhile, I finally did. I've got lots of ideas on a dictaphone tape recorder thingy and a couple of tunes that made it to the recording stage --so far. Getting back into writing lyrics has been a challenge, but its bee a real fun trip to date. Great good luck as you move forward, or re-forward. :-)

Cheers,

MR
