If your belief in Darwin is based on facts and evidence, then it is open to questioning by facts and evidence. If it is based upon a faith that cannot be questioned (i.e. Darwinism) then is it indeed belief and is a religion, not science.

So, if you believe Darwin is right, then you have no problem with looking at evidence right?

But if my questioning Darwin is insulting people, do you have a religion. Looks to me like you do.

Either way, no one was insulted, at least not by me.

tomorrow.I used to live in Hammond Louisiana and have partaken of both snake and

gator, garnished with shrimp with a remoulade made from Heinz ketchup, a small dollop of mayonaise and a larger dollop of freshly ground horseradish and black pepper, subsequently washed down with homemade strawberry wine. Sometimes I miss living in Louisiana. It was a fun place to live and to eat, though I don't think I drew a sober breath the entire time I was living there. Didn't seem to matter too much. No one else there was sober either.

Nope. My uncle, who knew her said she was not deranged. Yet,
when one makes the self the center of all morality, denying that
it can come from without, one is likely to find another who agrees,
and would like to take their money. do you deny this?

>That is insulting, not only to the many people who don't share your

No proselytizing. Doug and I were discussing issues related to
his point. If you don't enjoy the discussion, why don't you just skip
over those posts? Does this issue bring up things you would
rather not think about? If so, just leave these ones unread.

>...or for insults, whether you have the intestinal fortitude to to admit
to
>them or not.

No insults. Some folks hold to Darwin like a religion. It is undeniable, and compared to calling O'Hair deranged is pretty mild conversation I would say.
