Well unless the boxes guts are really old we can easily just do a parts upgrade.
We do that all the time for our customers.
Kinda funny upgrading a dual/dual core Opteron to a single quad core Intel. :)

Chris

>Mac to PC users,

If you spend half as much on a new PC as a new Mac you
guys will end up with a smoking PC/Paris/Cubase (insert any DAW) rig.
For this scenario I suggest Chris Ludwig all the way.
You won't have to learn anything and it will be a mofo comp
out of the box.

OTOH you can build your own, dig around for older parts and learn
all the ins/outs of PC building and save lots of money. The time
is more important to me these days.

I've built more than a few comps myself but think the knowledge
that Chris imparts into your rig is worth every penny not to
mention the lifetime support and supplied backup software.

Sincerely,
Tom

>Hi Guys,

I can share my experience a bit. First of all, my objective was to keep things bone simple, and use the pc only for paris (I've got 2 mac pro's that will be integrated with it, so I didn't need anything fancy).

My other thought was to go single core Athlon, also to keep things simple. I ended up going on ebay and grabbing a bare bones system consisting of atx case, mobo and cpu, with 1gb of ram.

Specs were:

CPU AMD Athlon 64 LE-1640 AM2 (2.7GHz) 45W 2000MHz FSB

Memory 1 Kingston DDR2 PC2-6400 1GB/800MHz
Motherboard BIOSTAR MCP6P-M2 (NVIDIA GF6150,SATAII,RAID,DDR2-800)
Video NVIDIA GeForce 6150 GPU Memory Share Up to 512MB
Audio Onboard High Definition Audio
Network Card Onboard Network Card
Case G-Power Stylish Deluxe Black Case (9021)
Power Supply 450W ATX Power Supply

These were all brand new parts. Cost was $144.00. Now, this system only has 2 pci slots and one pcie, so I am using a pcie-pci expansion chassis with 4 eds cards (virtuavia).

I added my own hard drives that were kicking around, and a (new) dual pci video card also from ebay for around $60 (there's onboard vga, but that only powers one display).

I just temporarily borrowed the cd rom drive from my mac to install windows xp. I installed the stripped down version of XP, but I have an xp pro license here as well for it (I always like to do things legit as everyone deserves to make a living from their hard work).

That's it. very inexpensive, brand new parts and runs great so far. Very easy to get up and running with paris, and far beyond the systems I've used with Paris in the past. In my opinion, keep it for paris only and keep it dirt simple.

If you need something to run cubase and paris etc, and need anything beyond the basics, then get someone like Chris L to build it for you and save the headaches.

Cheers,

TC

(Ted G)

Disclaimer: this isn't Mac vs PC advocacy. I should be clear about this
once again - I'm a PARIS Mac user from way back myself, and my main
work/production computer, the one I'm typing this on right now, is a
dual G5. This is to help folks who are interested in making that
transition in 2008/2009 to compile the info they'll need to guide them
in that transition.

- KHi Guys,

I can share my experience a bit. First of all, my objective was to keep things bone simple, and use the pc only for paris (I've got 2 mac pro's that will be integrated with it, so I didn't need anything fancy).

My other thought was to go single core Athlon, also to keep things simple. I ended up going on ebay and grabbing a bare bones system consisting of atx case, mobo and cpu, with 1gb of ram.

Specs were:

CPU AMD Athlon 64 LE-1640 AM2 (2.7GHz) 45W 2000MHz FSB

Memory 1 Kingston DDR2 PC2-6400 1GB/800MHz
Motherboard BIOSTAR MCP6P-M2 (NVIDIA GF6150,SATAII,RAID,DDR2-800)
Video NVIDIA GeForce 6150 GPU Memory Share Up to 512MB
Audio Onboard High Definition Audio
Network Card Onboard Network Card
Case G-Power Stylish Deluxe Black Case (9021)
Power Supply 450W ATX Power Supply

These were all brand new parts. Cost was $144.00. Now, this system only has 2 pci slots and one pcie, so I am using a pcie-pci expansion chassis with 4 eds cards (virtuavia).

I added my own hard drives that were kicking around, and a (new) dual pci video card also from ebay for around $60 (there's onboard vga, but that only powers one display).

>Hi All,

I've just past a really important milestone. In order to make the Scherzo thread-safe, I had to replace the circular arrays used by the original Scherzo with special Microsoft defined linked lists. I figured that would be the hardest part. It didn't turn out to be all that hard. I was just afraid of it because I had never worked with anything like the Microsoft linked lists.

Anyway, I'm playing audio on a new build that uses the linked lists. :)

The next step is moving the functionality of the delayed procedure call into the ISR and placing the ISR spinlock around the functions that change the IRQ masks.

We're making progress.

MikeI just put this text into Babblefish and I still can't understand it... ;-)

Everyone repeat after me.... We're not worthy!

David.

We need to get 12 tunes x 30 tracks out of CuBase (3) as wave files. All
edits must be preserved, but no EQ/Pan/Gain/Processing etc can accompany
the tracks.

What is the easiest way to export files from CuBase?
Logic has "Export all tracks as audio files". Is there something
similar in CuBase?

Appreciate the help

TedWe're not worthy... but man, I'm sure happy Mike's on the case!

able to develop practical methods of writing music and lyrics and recording

lots of great drum sounds and a good ear for jazz and latin drums, but I
lack either the right software or the right approach. Although I occasionally

chorus, etc.

Many thanks in advance for any tips or suggestions you may have.

Best wishes,
Richard FaylorBy "edits must be preserved" do mean that you want all the little
segments, or a single full length file per track?

David.

Thread-safe means that the code can be running on multiple CPUs at once without
crashing.

Cheers!

Well, to explain this better...

There is a block of code that runs every time a piece of hardware interrupts Windows to say "Hey, I'm ready for more data!" Microsft has put severe restrictions on that code because if anything goes wrong with it, the whole computer crashes.

One of the restrictions is that you can't use the tools that you would usually use to allow code to run on more than one CPU at once. They left one, single type of list that you can use that is safe in a multiple CPU environment - and I guess everyone just uses it. It's really weird to me, but it works just fine.

So, to make a long story short, I had to replace all the code that stores the info sent between the cards and the PARIS app with this new kind of list. I just finished removing all of the old list code, and PARIS is still running fine. :)

I've been so swamped teaching that I haven't been able to work on this for two months. My report cards went in last week, so Sunday I spent 3 hours, and I've spent a few hours tonight. It's moving fast.

Although it costs around $30 or so...it has worked flawlessly for me when
pulling files from Cubase as WAV file / individual tracks.

That sounds really great. Now we're talking about the Scherzo drivers
not the whole Paris app right? What benefit will this give us when

you get it ready for prime time? Will this eliminate some of the
multicore hurdles we have to jump now?

I am totally ready for whatever it is you can do for us and will gladly
pay you for your service.

Thankfully yours,
Tom

Geez, with all the work it looks like you've done, wouldn't it
be easier just to write a new DAW app that works with the Paris
hardware & incorporates your plugins? lol

NeilHi, Aaron. Thanks for the tips on bus mastering mode. Unfortunately, my PARIS
rig is still dead in the water.

I haven't heard of the Official Paris list you speak of. Tell me more...

>John,

I appreciate your response. I was unable to find any references to NOIDE
in the registry.

If all else fails, I may try a total reload of the operating system and PARIS
3.0.

Does ID still issue codes to unlock 3.0 when you install a new system?

Thanks.

Bob H.

;)Kerry Galloway has been doing a fine job collecting as much data on
users/systems/debugging and such as is available and keeping up the new
Paris WIKI site. I'll step to the side and let him take over on the
specifics on this and where to find the info/how to get on the list.

>Best wishes,
>Richard Faylor
>Heya Richard; concepts in drum programming have progressed by leaps and bounds since OS9 was discontinued. After multi-layered samples (so different velocities triggered different samples) proved insufficient for realism, the hippest drum sequencing plugins moved to techniques like "alternate strokes" where even two consecutive snares at the same velocity trigger different R hand and L hand samples, and multiple samples for each stroke so you can "mix" your drums for more "room" or capture bleed from one in the mics of the others.

Drum programs also started to add sequencer components with included performance libraries of MIDI patterns. Most of the stuff requires a reasonably fast computer and OSX. Things that might interest you would include:

FXPansion's BFD http://www.fxpansion.com/index.php?page=1

XLNAudio's "Addictive Drums" http://www.xlnaudio.com/

For percussion, Wizoo's "Latigo", a killer Latin percussion sequencer http://www.soundonsound.com/sos/jun05/articles/wizoo.htm

It might be worth your while to consider booting into OSX to do your drum programming in order to take advantage of the possibilities these packages offer, many of them undreamed-of in the days of OS9 - and for what a single drum sample CD used to cost.

Regards,
Kerry, Annette and Jack.
----------19751660231335584115--Hey Kerry,

Sorry to hear that.. that's always a tough one.

Cheers,

TC

> Wow, what a great site Graham, lots of great audio info, thanks.
> RobJust wanted to say hi to everyone.Some of you may remember me from a few years ago. I decided to go into a NEVE/SSL/PT studio deal with some friends and that's still working out well. I never got rid of my PARIS stuff,but it just hasn't been getting used so I posted it in the for sale section.I might end up hanging onto to some of it,we'll see.

I'm glad to see PARIS is still alive and this community is still happening;it's a cool system and there's great people here. I'll check in ocassionally and see what's up.

peace,
Pete Ruthenburg
www.musiccreekstudios.comVery easy to do. And quick. Create "parts" for all your audio files, and
drag the beginning of each part to the beginning of the project. Then select your tracks and "bounce" (not export) your tracks. In the dialog that comes up, tell Cubase to replace your files with the new ones. Your old files won't be gone, they just won't show up as active in your project, and will be placed in the Trash for you to decide what to do with them. If you erase the files in the trash from your hard drive, you'll only be left with the rendered files in the project's audio folder. If you'd rather not be so destructive, open the project audio folder in Explorer, and sort the files by date/time. That way you can easily see the rendered files, select them, and copy them to an alternate folder.

Thanks gang. Sorry for the OT "pity party"; was just feeling kinda low.

- KOnly Dog People can know that dogs are people too. I'm sorry for your loss...

I'm sincerely sorry to hear this. I'm glad you had those fifteen
years.
DeejThanks David. I'll pass this along. It's for my brother,
who is switching mixing engineers on his wife's CD.

Thanks Deej. I knew you'd get it. Last week she was walking in the park with us and chasing sticks at the lake and enjoying life like any Lab. Couple of days later she'd just lost the will to be here any more. Never a single whimper of complaint, nor any sign of pain or distress - just swiftly weaker over about four days until she couldn't stand up any more. When she lost interest in eating or drinking and couldn't hold her head up for long I knew it was coming soon.

Yesterday I carried her outside on a quilt to sleep in the sun for an hour or two, and she summoned up the energy for about five paces and a round of wags. It wore her out completely. And I would have cheerfully kept carrying her up and down the stairs to go outside for as long as she had no pain and wanted to stick around, but she was saying "thanks - it's been lots of fun, but now it's my time".

Hope she's out on that beach right now.

- K

I've got a big lump in my throat and a tear in my eye right now. I've been
there and will be there agains soon. Our two danes just turned six. I know

what's ahead. It sounds like you gave her a great life and the help she needed
to make it to that beach. Good for you Kerry. She's a lucky girl.

DeejHow can I inport new patch bay setup in old Project? Can I save all patch
bay setups somewhere?
Thanks

GoranOw. Sorry man. I got a 16 year old kitty . . . dreading the day.
Condolences.

S

saddens me to think of the loss. But the memories will survive and there is
always a new pup to begin a new friendship.

Rich

Hey John; according to one chart she was 93 in human years. That's the
west coast of Vancouver Island - Chesterman Beach in Tofino, just south
of the Wickaninnish Inn and looking south toward Frank Island. We went
there at least once pretty much every year; if you do Google Earth, try

- Knice area. we made it as far as the Juan de fuca trail at China Beach. Awesome
island ! Had a blast renting scooters and zooming around. And I love the
buffet on the ferry !

JohnThey used to have a killer clam chowder on the ferry, then White Spot
took it over...

David.

Heh. I grew up riding those ferries in the 60s and 70s; the clam
chowder was a part of my childhood, as was the Cream Of Celery soup,
which we called "Ferry Soup".

- KDitto... I grew up in Deep Cove North Van, the Grandparents lived in
Sidney, so I spent a *lot* of time on those ferries!

David.

Hey Kerry -

Thanks for posting. We had to put our dog Zippy down this past August. He was 14 and a bit. He was the largest Sheltie anyone's seen, and his father was grand national champion purchased by a Japanese outfit for stud. He had a calm demeanor (not big on yappy dogs) and a stout heart. He once stared down a pit bull from around the corner. If they had gotten into it, he wouldn't have lasted of course, but he showed up...

We still have his great nephew, Duncan, and his name is present in our business Zip The Dog Inc

My wife and our 2 kids all went to the vet's. Very very sad.

Take care,

Ted

Kerry-

it's posts like yours and the comments following it that keep me coming back
here after all these years.

one of my saddest days was taking my mon's 15 year old cat on a one way trip
to the vet.

sincerest condolences for you and your family. those photos are great.

-steveI don't have the manual in front of me right now but if I remember correctly
you have two areas to the right, one on top of the other that hold local
patchbays and global (for all projects). There are arrows at the top that
move the stored patchbays left and right from the local to the main window
with all the modules and there are buttons to move patchbays up and down
from local to global. There should also be buttons to save / open to and
from a file. You can open these files in any project and easily go back

and forth from project to project with your patchbays.Awesome looking Sheltie !

Corrupted Default Project 'unhandled exception: c0000005 at address: 00481382'

'Paris has caused an error in Paris.exe'

1. Delete or move the offending default project file out of the Paris
directory.
2. Deinstall Paris.
3. Go to the windows system folder and
a. delete the directory that says Ensoniq if present

b. delete the file Paris_StudioControlLibrary.dll if present
c. Reinstall Paris
4. Start with one card.
5. If necessary, go to plain vanilla sytem, meaning ALL cards removed except for video and 1-EDS. Once that is working, start adding others one at a time until all is working.

I am not suspecting your card swapping for the moment because it sounds like the hardware initialized, but then could not open the default_project.ppj.

This makes me think it was a corrupted ppj file, or other corrupted Paris components. Hence the above advice.

Some things to make note of:
1. Did Paris work initially with your new advancesys scsi card or did it stop working immediately after you installed the new card?

2. If you remove the advancesys and put everything else back where it was before, does it all work fine? (you may need to force a PnP update via your bios)Goran,

When saving always right click. It will save your modules too!
Save to disk on the little pull down menu up top in a folder of your choosing.
Load from that folder into other projects.

Tom

We have an all white small (4.5lbs) cat named Lilly. She had developed a scab on her ear that grew to be the size of a large marble. It would heal then she'd scratch, then it would open up and blood would be everywhere.
This went on for months. Very messy and sad.
She was diagnosed with cancer. She began to break down and couldn't jump anymore. We brought her

to the vet who said she should be put down. I didn't
concur.

We brought her home, her scab eventually healed because
she learned to stop scratching it on her own. My wife heard that
beets are good for cancer. We mix beet juice with chicken broth
and that has made some kind of difference it seems. Now she
is full of piss and vinegar with only little tiny scabs on both ears.
No biggy.

We're so glad we didn't put her down when it was suggested.
Four months later, no signs of any pains and she jumps, runs and
plays like our other three cats.

Even if she failed tomorrow the last four months have been awesome
for everyone involved. Just ask Lilly.

Respectfully,
Tom

I have a usb mouse, keyboard and midi patchbay.
These all need a 25'-40' run. I also plan to eventually
run 4 DVI about the same distance.

These are the products I'm looking at for usb:
 http://www.tigerdirect.com/applications/SearchTools/item-det
ails.asp?EdpNo=2893288&CatId=444

or if that won't be stable, this is lots more money:
http://www.gefen.com/kvm/dproduct.jsp?prod_id=2218

These are the long run DVI products:
 http://www.tigerdirect.com/applications/SearchTools/item-det
ails.asp?EdpNo=2815509&CatId=79

or:
 http://www.tigerdirect.com/applications/SearchTools/item-det
ails.asp?EdpNo=1643055&CatId=1163

I was hoping for a less expensive alternative. My existing USB extension
($30) is suspect. I lose
my midi patchbay within Cubase at least once in an 4-8 hour session. Often
times the computer
locks up too.

Any other ideas folks?
TomOne other thing I might mention is that a friend had her DVDs going bad
after repeated cleanings with Windex and/or alcohol - no scratches, but they
no longer read.

on startup.

I don't have a multiple card sys, so this may be useless(!) but I'm thinking
of any windows (editor, mixer , etc) that might open up for that card from
the default ppj

Not sure what you're using right now. I use these.

http://reviews.cnet.com/networking-and-wi-fi/bafo-usb-2-0/45 05-3243_7-30613791.html

I've never had a problem with them. I have daisy chained 2 of them along

with a 15' USB2.0 non active extender and it worked fine to get a Frontier
Alphatrack happening about 45 feet from my computer in my tracking area.

DeejHey Deej,

That looks simular to what I've been using with less success.
Maybe mine isn't USB 2.0? I bought it about one year ago.
I'll have to check. Maybe that's the problem.

Maybe my problems aren't USB related but wireless
USB key/mouse related?

Thanks,
Tom

1) I'm agreeing with you that the PARIS app is probably not corrupt as I
was able to return everything to a working state simply by reconnecting that
second EDS.

2) I don't have any AdvanceSys SCSI card... AGP video card, 2xEDS, 1 UAD
card.

3) I did try removing the UAD card with just the one EDS and it still wouldn't
work.

If I remove the second EDS (keeping EDS and UAD) should I force the BIOS
update? could that be my problem? Not sure how to do that, but I bet I can
find it in the BIOS...

and then to Kerr...

could be! Now that I have both cards in, how do I create a ppj to only look
for one card? I've been away from PARIS for some time so I'm a bit rusty...

thanks!

>To create a ppj with only one card, I would think it would be enough to make sure you only have one submix created (and assigned to the card you're going to keep), and then if you have any other windows open, they should automatically be assigned to that submix (and therefore the kept card), although it might be worth shutting all windows anyway.

I think if you save that as your default ppj, it might do the trick.

if not, you could consider stripping it back further and getting rid of any patchbay settings, etc.

best of luck,

Kerr

I think that's what I'm using here now with my
Midi Patchbay. Maybe the mistake I am
making is using only one repeater then a regular USB
cable attached to that. I'll get another and see if
that doesn't solve my problem.

I read that USB 2.0 shouldn't work with repeaters.
Everyone says it does though.

Good info!

Tom

Doesn't say.. are you 'sure' these are USB 2.0 and are they using TCP ethernet or just using that connector (RJ45) type? I might also question latency on these, since you're talking about running a hardware app through them that is definitely sensitive to that kind of problem.

Same thing as above... check compliance and latency specs. I would say this to 'any' device you insert in your path.

Less expensive usually means more hassle I've found. Consider what is your time worth, and base your decisions on taking chances or not. Only you know that answer bro :)

1/4 *MILE* !! We have a 1/2 mile deep and about 3/4 mile wide facility.
Old habits, talking audio, typing that connector... duh...
I can reach the pre and routing stage with Soundweb, however the amps
require a slightly different method so I'm improvising. It's all going to be
CDi or XTi, and every building will be a Venue on the main network if I have
my way about it.

>>My girlfriend rescued (the momma dog had the pups and some loser dumped the whole lot in her backyard, but she just couldn't turn them over to the pound.....) an entire family of dogs last January/February in the middle of that really nasty ice storm that took down the whole city for weeks. One of the little fuzzy guys attached himself to me immediately as we shifted them back and forth from whoever had the warmest house and time to take care of them. He slept a lot (which is how he got the name Crash), and the worms almost got him before I could get him treated. He could fit literally in my hand and hardly hang over the edges.
I kept him. As he was recovering he stayed right next to me even making the trek to work a few times. We had FEMA onsite, and we're the jumping off position for all the power outages that were being dealt with for the region, so needless to say timing for adding a new fur baby was not exactly good. Just as we were coming out of that and into the next busy season here for my workplace, apparantly some stray came up in the yard and pissed his Parvo all over it, and almost took little dude out again. He's over all that now, but to point the vet told me basically to expect to lose him. 2 blood transfusions and many, many dollars later he's a fine and healthy young man getting ready for his 1st birthday. I don't know what I'd do without him now. I included the rest of the fuzzy kids. Each one of them a blessing. Flynn in the last pic had cancer also, and I had to have his eye removed. He still quite alive and quite full of the aforementioned piss and vinegar, and definitely my most aggressive protector.

Their not always right, are they Tom? Glad you didn't go that route and it all worked out as hoped.

Heard it, not impressed at all. Alice Cooper does better work in 3 months.
  17 years and 13 million dollars....hilarious. Zeppelin was recorded in
2 weeks and mixed in 2 days....just a bit of perspective

JohnWell, in the 4 years or so since I last used Paris I've completely forgotten
the install routine for XP. Must be Oldtimers Disease.

Could some kind soul direct me to the instructions?

When I try to install, it extracts files for a moment and then nothing. XP
SP2.

thanks!

MikeI think the instructions are up at http://www.parisfaqs.com/parisonxp.html
Built any sweet mics lately?

AA

No, no new gear projects lately. I decided to dust off the old Paris rig
this morning and went immediately to computer hell!
Thanks for the pointer to the instructions!

Mikehttp://www.kfocus.com/paris
setup / xp setup.....

run the setup app to install the scherzo drivers, reboot, then install Paris,
reboot, then the effects subsystem, then reboot.

musicxp.com tips

Processor Scheduling for Background Services
Visual Effects for best performance
Switch Off Desktop Background Image
Disable Screen Saver
Disable Fast User Switching
Switch Off Power Schemes
Switch Off Hibernation
Disable System Sounds
Do Not Map Through Soundcard
Disable System Restore
Disable Automatic Updates
Startup and Recovery Options
Disable Error Reporting
Disable Remote Assistance

Fixed Swap File (Virtual Memory)
Speed up Menus
Disable Offline Files
Disable Remote Desktop
Disable Internet Synchronise Time
Disable Hide Inactive Icons
Disable Automatic Desktop Cleanup Wizard
Disable NTFS Last Access Time Logging (NTFS Only)
Disable Notification Area Balloon Tips
Disable CDROM Autoplay
Disable Disc Indexing

Additional tips
---

2 audio Partitions
Use NTFS drives with 64k clusters
In BIOS disable USB, LPT1, Serial port
Remove Messenger
Classic Mode
Classic Start Menu
Power Schemes: you can have the monitor turn off but set Turn Hard Drives off to NEVER
Disable the Computer Browser in Services to improve mapped drive browsing.
Disable your network card by right clicking on the nic icon
Defrag regularly
Keep your desktop clean
No wallpapers
Set video to highest color depth
Increase your IRQ priority
Disable Power Management
Set graphic acceleration to full
Disable background applications
Disable USB
Graphical window settings
Disable NTFS Last Access Time Logging (NTFS Only)
Maker sure DMA mode is enabled on drives

Restart your machine at this point in time. When you come back the first thing you should do is defrag the main drive even if it doesn't say it needs it. This way the swap file has been truly set and you're ready to continue.

Processor scheduling should be set to background services and not Programs.
Start > Settings > Control Panel > System > Advanced > Performance Settings > Advanced Tab > Background Services

Advanced tab: Press Settings tab under Performance Visual Effects tab: set to Adjust for Best Performance.

Switch Off Desktop Background Image
Right Click Desktop > Properties > Desktop Tab > Background None

Click on the Screen Saver tab, Set Screensaver to None, Press the Power button near the bottom

Disable Fast User Switching
Start > Settings > Control Panel > User Accounts > Change the way users log on or off > Untick Use Fast User Switching

Switch Off Power Schemes
Start > Settings > Control Panel > Power Options > Always On > Turn off monitor and turn off hard discs to Never

Switch Off Hibernation
Start > Settings > Control Panel > Power Options > Hibernate > Untick Hibernation

Disable System Sounds
Start > Settings > Control Panel > Sounds and Audio Devices > Sounds Tab > Sound Scheme to None.

Do Not Map Through Soundcard
Start > Settings > Control Panel > Sounds and Audio Devices > Hardware Tab > (highlight your soundcard from the list) > Properties > Audio Devices > (highlight your soundcard from the list) > Properties, and check the "Do not map through this device" checkbox.

Disable System Restore
Start > Settings > Control Panel> System > System Restore Tab. Tick the "Turn off System Restore on all Drives"

Disable Automatic Updates
Switch off Automatic Updates by going to Control Panel, System, Automatic Updates and ticking the box labelled "Turn off automatic updating. I want to update my computer manually."

Startup and Recovery Options
Right click My Computer and click on Properties > Advanced > Start Up & Recovery Settings and uncheck "Automatically Restart".

Disable Error Reporting
Start > Settings > Control Panel > System > Advanced TAB > Error Reporting > Click the Disable Error Reporting box (Tick the "But Notify Me When Critical Errors Occur" if you prefer)

Disable Remote Assistance
Start > Settings > Control Panel > System > Remote > Untick "Allow Remote Assistance Invitations to be sent from this computer"

Disable Remote Desktop
Start > Settings > Control Panel > System > Remote > Untick "Allow users to connect remotely to this computer"

Fixed Swap File (Virtual Memory)
Select the Advanced tab of the Systems applet and then select the Performance settings button. Then select the Advanced page. In here it is possible to customise the Virtual Memory. For custom size, this is often recommended to be 1.5 to 2 times the amount of your total RAM for both initial and maximum size. Set this to a fixed minimum and maximum value according to your existing RAM

Speed Up Menus
You can use this tip to speed up the Start Menu in Windows XP. You can customize the speed of the Start Menu by editing a Registry Key. Click Start, and then click Run. Type Regedit in the box, and then click OK. Expand the menu in the left panel and select the HKEY_CURRENT_USER\Control Panel\Desktop folder. Scroll down in the right panel and double click on the MenuShowDelay file. In the Value Data box, change to default value for the menu speed from 400 to a lesser number, such as 1. Click OK.

Disable Offline Files
Start > Settings > Control Panel > Folder Options > Offline Files > Untick "Enable Offline Files"

Disable Internet Synchronise Time
Start > Settings > Control Panel > Date and Time > Internet Time > Untick "Automatically synchronize with an internet time server"

Disable Hide Inactive Icons
Start > Settings > Taskbar and Start Menu > Taskbar TAB > Uncheck "Hide Inactive Icons"

Disable Automatic Desktop Cleanup Wizard
Start > Settings > Control Panel > Display > Desktop > Customise Desktop > Untick "Run Desktop Cleanup Wizard every 60 days"

Disable NTFS Last Access Time Logging (NTFS Only)
Start > Run > regedit > HKEY_LOCAL_MACHINE > SYSTEM > CURRENTCONTROLSET > CONTROL > FILESYSTEM Add a new DWORD value - "NtfsDisableLastAccessUpdate" (without quotes) and set the value to 1. Then reboot to make changes effective

Disable Notification Area Balloon Tips

Click Start , click Run , type regedit , and then press ENTER. HKEY_CURRENT_USER\Software\Microsoft\Windows\ CurrentVersion\Explorer\Advanced Right-click the right pane, create a new DWORD value, and then name it EnableBalloonTips . Double-click this new entry, and then give it a hexadecimal value of 0 . Quit Registry Editor. Log off Windows, and then log back on.

Disable CDROM Autoplay
One of the very important (and well documented) tweaks in Windows 98SE, was to disable CDROM autoplay (auto insert notification). Disabling CDROM autoplay no longer offers a significant performance benefit in Windows XP, and therefore you do not need to disable it. Just don't insert a CD during a crucial recording.

However, if you really want to disable it then here a few different methods.

Method 1

Start > Run > Regedit

HKEY_LOCAL_MACHINE\System\CurrentControlSet\Services\Cdrom

Set autorun to 0.

Method 2

Open My Computer Right Click on each CDROM and choose Properties Click on the Auto Play tab In the drop down box you can choose the Action for each choice shown in the drop down box

Method 3

Go to Start->Run->gpedit.msc Computer Config -> Administrative Template -> System Double click Turn off Autoplay Enable it.

Disable Disc Indexing
Indexing Service is a service that extracts the information from a set of documents and organizes it in a way that makes it quick and easy to access that information through the Windows XP Search function, the Indexing Service query form, or a Web browser.

This information can include text from within a document, (its contents), and the characteristics and parameters of the document, (its properties), such as the author's name. Once the index is created, you can search, or query the index for documents that contain key words, phrases, or properties.

Additional tips Descriptions

Partitioning. A useful tip when configuring your audio disc, is to split
this into two partitions. Set up a smaller "audio scratch" partition - say
6GB of a 30GB hard disc. This partition will be used for the songs that you
are currently working on. The benefit of a smaller partition is obviously
quicker defragmentation. If you use the entire 30GB as one partition, then
this will take ages to defragment. When you are finished with a song, transfer
the audio files to the non-scratch partition, where disc I/O performance
isn't so critical.

Messenger starts up at the windows load up but we can get rid of that in
no time at all..
Start Menu>Run
Type this in exactly as it is here:
RunDll32 advpack.dll,LaunchINFSection %windir%\INF\msmsgs.inf,BLC.Remove
Hit Enter...you will see a DOS-like shell appear and disappear very quickly
and then it will ask you to restart.

Right-click on your desktop, and then click Properties.
Click on Themes tab
Set Themes to Windows Classic

Also do this for the Start Menu:
Right-click the Start button, and then click Properties.
Click Classic Start menu.
Click the Customize button to select items to display on the Start menu.
By default, selecting the Classic Start menu also adds the My Documents,
My Computer, My Network Places, and Internet Explorer icons to your desktop.

Increase your IRQ priority - You can increase the IRQ priority of the real-time
CMOS clock to gain some system performance by doing the following:
1.) First create a text file with the extension .reg
2.) Paste the following into the file:

REGEDIT4
 [HKEY_LOCAL_MACHINE\System\CurrentControlSet\Control\Priorit yControl]
"IRQ8Priority"=dword:00000001

3.) Double-click on the file to enter the tweak into your registry.

This can be un-installed should you need to by repeating the three steps
above with a new file, except this time use the following in your .reg file:

 [HKEY_LOCAL_MACHINE\System\CurrentControlSet\Control\Priorit yControl]

"IRQ8Priority"=dword:00000000

On" and set "System Standby", "Turn off hard disks" and "Turn off monitor"
to "Never".

Set graphic acceleration to full - You can do this by going to your desktop,
right clicking and clicking on "Properties" then on "Settings", "Advanced"
and the "Performance" tab. Make sure the Hardware Acceleration slider is
set to "full" to reduce the load on your CPU.

Disable background applications - Background applications start up when your
computer starts up and can use up unneccicary resources. To prevent these

on the "startup tab" and disable (uncheck) programs such as "taskmon", "load
power profile", "real player", "office startup", "winamp agent" and so on.
Keep programs like "scan registry", "system tray" and programs relating to
interfacing with your audio card (such as console software to control its
features).

Disable USB - If you do not have any devices actively using USB in your system
(this includes dongles for your software), disable USB as it is known to
sometimes cause problems in certain DAW configurations. Not only will this
help to increase system performance, but it will also free up an IRQ. Right
click on your "My Computer" icon on your desktop and select "Properties".
Click on the "Device Manager" tab and scroll down until you see the USB section.
Click on the "Properties" for the USB device and check off "Disable in this
Hardware Profile". You will have to reboot for these settings to take effect.

on the "View" tab. Under "Visual settings" check off "Show window contents
while dragging. This is more of a usability tweak, as it will allow you to
see the contents of windows on the screen as you drag them around (instead
of them going blank).

Disable NTFS Last Access Time Logging (NTFS Only), Start > Run > regedit
> HKEY_LOCAL_MACHINE > SYSTEM > CURRENTCONTROLSET > CONTROL >
FILESYSTEM
Add a new DWORD value - "NtfsDisableLastAccessUpdate" (without quotes) and
set the value to 1. Then reboot to make changes effectiveI haven't heard the album but I heard a couple clips that I actually
thought sounded really good (the song "Better" or whatever it is), and
read some lyrics that were also well written. It also seems to be
cinematic in aspiration, which is something I like.

Compared to the current state of rock music, the G n'R clips I heard sounded fresh (ironically) and has some passion. I really can't stand the corporate rock shit that is out their today, it makes my skin crawl- which is why I haven't been able to listen to much new rock in the last few years, and usually gravitate towards electronica and acid jazz or Radiohead or old Faith no More albums.

I think I may actually pick it up though.. maybe I'm just intrigued from the hype.

Cheers,

TC

Anyone ever experienced this?Hey... fixed it!

I tried all sorts of stuff with the PPJ and patch bay configs... ended up with this:

Years ago I had modified the PARIS executable for a cooler skin. I put back the original PARIS.exe and it works like a charm!

Thanks for all the help... now I gotta figure out how to get that skin back... only kidding!

the installer for Paris...

Try this:
Windowskey + Pause/Break key
Advanced Tab
Performance -> Data Execution Prevention tab
Add the Paris EXE file and set for *turn on DEP for all programs and
services except those I select*

Does it run now? If not, I'd look at possible corruption of your installer
or a 3rd party issue.. like say, Norton/Symantec.

Johnwell, because, our CD was, after all recorded and mixed entirely in PARIS.
Anyway . . . see "holiday specials" blurb on the general page.

Thanks,

SWe've had mixed success with the XTi... lots of failures. Also, the DSP
is after the input level controls, so the noise floor of the DSP (which
is substantial) can't be attenuated.

David.

>Most of what we're using it for is not musical production, it's paging in
buildings/barns so it works out fine for that. The CDi-1000 is the model
most used at this point. I've seen some failures here on that but it's
mainly due to being subjected to a nasty environment and heat. The K1's and
K2's have been pretty solid, but have no USB control. They're getting up
there in age though, so what would you recommend as a replacement there that
has USB interface feedback and control? Those are mostly in our main
pavilion and are a music production setting. (
http://www.exposquare.com/es/facilities/pavilion.asp)

The XTi I've had personal experience with using it for my live band, and
it's been pretty bullet proof so far. But then again, a noisy club wouldn't
show much noise floor issue really.
It's good to know though that they have that issue so I won't try to use
them in a more critical environment.

>>Hey Deej,

Magma IRQs are a big part of the setup for me.
I know you are on top of this like a, ... well, whatever.

If it's easy enough to find can you post that here for me and others again?
I'll be using the older PCI style Magma with 5 EDS and maybe the Creamware
Pro if it likes being there. Maybe the Creamware card will be happier
directly in the computer though? 3 PCI and 3 PCIe available.

I am inches away from implementing the largest/fastest Paris/Cubase system
I've ever dreamed about.

I'll keep everyone posted throughout the process.

Thanks,
TomI did find out that the opening verse of Street of Dreams cleared out my constipation
tough. Trying singing it. You'll clear right up!!;-)

Still haven't picked it up and actually heard the cd yet, so you may be correct.

As for your constipation problem, I prefer a nice bowl of Fiber 1 for that task.. thanks for sharing though..

Cheers,

TC

John wrote:

> tough. Trying singing it. You'll clear right up!!I actually really, really like it. It wasn't what I expected at all. But,
the more I listen to it, the more it grows on me. I'm not defending 17 years and 13 million, but I'm glad it finally came out.

It sounds like a solo album. You can tell it's all one writer. But, I've missed production on rock albums. It just seems like everything I've heard lately has been done fast and cheap with nothing much interesting about it. This album has interesting layers and sounds. The best part is that I don't think the layering and the production have reduced the emotion conveyed, as can happen.

In my car, the vocals sound like they were mixed too low and the snare sounds a bit too loud, but they both sound fine on my beloved NS10s.

Hey, maybe it will spark a trend of spending more money on recording. :)

All the best,

MikeCool, I'm going to go buy it then. I like big production, and layers and emotion and attitude.

What I can't stand is contrived slop that's geared to radio, with lyrics that seem like they were written by a 12 year old.. (which is most of the rock out there today).

That's what made "Appetite" so brilliant, and Nirvana's "Nevermind", and Soundgarden, and Faith no More.. it was all emotional rock music that wasn't contrived, or at least didn't come off that way to me..

I seriously can't listen to radio today, it makes me barf..

Cheers,

TC

Tom,

What mobo? If you are using the the same as mine, here's my skinny.....

Q9450 CPU OC'ed to 3.2GHz;
Gigabyte GA-EP35-DS3 mobo
PNY Quadro graphics card (Nvidia driver);
4G RAM

SSL Duende PCIe
UAD-2 Quad
Magma x 13 PCI > PCI w/ 4 x UAD-1 cards
Magma x 13 PCIe > PCI w/ RME Multiface, RME MADI, and RME AES 32
Cubase 4.5x

The devices/drivers are configured as follows:

PCIe_1: OPEN

PCIe _16_1: PNY Quadro-IRQ 16 & 17

PCIe_2: Pro Tools Branded 13 slot Magma PCI chassis hosting RME Multiface, MADI and AES32 PCI cards in slots 1, 5 and 7, interfacing the mobo PCIe slot using a Magma PEHIFX1host card. All cards share IRQ 18

PCIe_3: UAD-2-IRQ 17

PCIe_16_2: Duende PCIe-IRQ 16

PCI_1: Pro Tools Branded 13 slot Magma PCI chassis hosting 4 x UAD-1 cards in slots 1, 5, 7 and 11-All cards share IRQ 20

PCI_2: OPEN

If you are only using one 13 x slot Magma, you can be relatively certain that slots 2 and 4 will share an IRQ and it will not be she same IRQ that is shared by slots 1, 5, 7 and 11.

The onboard LAN shares IRQ 17 with no ill effects. there are no FW devices on this machine and it is disabled in the BIOS.

Hope this helps:
DeejThanks Deej,

Sounds like we have about the same box.
I have the same mobo but mine says GA-EP35-ES3P
When counting slots in the Magma are you going left to right looking at the front of the chassis? My power supply is in the right rear corner. The Magma card sits on the far left.

I should think it will work the same as yours. I'll have to get those long ribbons made for Paris to sit in slots so far apart. Magma host card can go in PCI 1 on mobo. I'll have five cards so maybe 1 EDS can take the other IRQ from slot 4, the other four can share 1, 5, 7, 11. Creamware can sit in the computer on PCI slot 2. The UAD-2 is installed in PCIe 2 right now.

Sound good to you?

Thanks for all your info in this world. It will save me weeks
I should think.

Happy,
Tom

Same as mine.

>
>I should think it will work the same as yours. I'll have
>to get those long ribbons made for Paris to sit in slots

>so far apart.

I think I've got a set of the xtra long ones here that I got custom made
from Morgan a few years ago if you need them.

>Magma host card can go in PCI 1 on mobo.

This will work but will force anything that is interfacing with PCI slot
2 to share with the same IRQ that PCIe_16_1 uses which is your video card.....may
be a problem, maybe not. If you've got a Magma that uses the round SCSI style
cable, I'd strongly recommend that you get the Magma PEHIFX1 host card.

>I'll have five cards so maybe 1 EDS can
>take the other IRQ from slot 4, the other four can share
>1, 5, 7, 11.

This will probably work. If your Magma has uses the flat cable I think your
4 x bus sharing slots will be 1, 4, 8 and 12. You'll just have to swap them
around until you find what works if you
're using more than 4 cards.

>Creamware can sit in the computer on PCI
>slot 2.

If your Magma is interfacing with the PCI slot #1, this will almost certainly
force your Creamware card to share with the IRQ that your PCIe_16_1 slot
(video card) is sharing (and may also create a scenarion wherein your CW
card is also sharing an IRQ with the EDS card in slot #4 of your Magma)...at
least that was my experience. Whether or not that will be a show stopper,
I don't know. My Duende and my UAD-2 are sharing this IRQ with the video
card slot with no real issues, but they are all PCIe devices. Not sure how
it will work with PCI and PCIe sharing but I have found this mobo to be pretty
forgiving using ACPI.

>The UAD-2 is installed in PCIe 2 right now.

>Sound good to you?

That's the slot I'm using for my Magma PCIe host card so I can't say.
>
>Thanks for all your info in this world. It will save me weeks
>I should think.

My # is 970-769-0488. Give me a call if you hit a snag. Maybe I can help.

;)
DeejHi Deej,

I'd love to snag those EDS ribbons from you. How many can you spare and do you also have the clock cables? Tell me what you need for them and shipping. Any long ADAT cables floating around?

My Magma cable is the flat type so 1, 4, 8 & 12 it seems for me.

If I use PCI slot 2 will that throw the Magma assignments off?

I was thinking that the PCI bus may deal more easily with the Creamware card if it wasn't in the Magma with 5 EDS guys. The UAD-2 sharing with video
sounds great if it isn't a problem for you. My video card only uses one IRQ anyway.

Here's what I have with only the UAD-2 installed in PCIe 1x #2 with the 16x Video card also.

PCI 1-9 = either not shown or one thing is on each
PCI 11 = Wide Open
PCI 15 = Wide Open
IRQ 16 = NVidia GeForce 8600GT
Intel(R) ICH9 Family PCI Express Root Port 1 - 2940
Intel(R) ICH9 Family PCI Express Root Port 5 - 2948
Intel(R) ICH9 Family USB Universal Host Controller - 2937
Intel(R) G33/G31/P35 Express Chipset PCI Express Root Port - 29C1

IRQ 17 = Intel(R) ICH9 Family PCI Express Root Port 2 - 2942
Intel(R) ICH9 Family PCI Express Root Port 6 - 294A
Realtek Gigabit Ethernet NIC
Universal Audio UAD-2 Duo DSP card

IRQ 18 = USB Universal Host Controller
USB Universal Host Controller
USB Enhanced Host Controller

IRQ 19 = Sata Raid Controller
USB Host Controller

IRQ 20 = wide open
IRQ 21 = USB Host Controller
IRQ 22 = wide open
IRQ 23 = USB Host Controller
Enhanced USB Host Controller

Where would you start?

I'm getting all excited about IRQs. Oh man.
Tom

I've got BNC and ADAT cables out the wazoo. Way more than I'll ever use again. Let's talk by phone ofer the weekend and figure out what you need vs what I have here.

>
>My Magma cable is the flat type so 1, 4, 8 & 12 it seems for me.
>

OK then. You're gonna have to go PCI.

>If I use PCI slot 2 will that throw the Magma assignments off?

Maybe. It may not create any issues on that particular mobo though. Lots of available bandwidth. The question would be withether or not you will have enought bandwidth on the PCI bus itself if the CW and EDS cards are sharing IRQ.

>
>I was thinking that the PCI bus may deal more easily with the Creamware
>card if it wasn't in the Magma with 5 EDS guys.

If you're going with 5 x EDS cards, one of these will end up on a different IRQ from the other 4. If that IRQ shares with the PCI2 slot, then you may have a trainwreck. I just don't know what to tell you at this point.

The UAD-2 sharing with
>video
>sounds great if it isn't a problem for you. My video card only uses one IRQ

You're gonna be good there.

It's going to be a trial and error situation, but I'd bet that you will succeed.
That's a very forgiving mobo. Another option you have would be to buy a second
(newer) Magma PCI chassis and a PCIe host card for it. If you go to EBay,
be doubly sure to inquire as o whether or not it uses the round cable to
connect the host cards. the older model with the flat cable won't accept
a PCIe host interface.

BTW....I was doing some checking and found this.....very rare to see
one of these.

Cheers,

DeejHey Deej,

I'll call you over the weekend and work through some of this.
I will need about 6 x 6'+ adat cables. I suspect at least
three long sync cables and five of the fatter ribbons.
I don't need WC though.

I'm not really worried about the PCI bus since Paris was designed
to work under those conditions. The Creamware card should
be as isolated from the Paris IRQ trainwreck as possible.
Brian sure had his way with Paris. I should think I'll get it to work.

I'm having no problems with 4 EDS, and a UAD-1 in a 5 slot machine now.
I lucked out. So that's all it takes I guess!

I'm ready to do this. Failure is not an option.

Thanks for your help,
Tom

>Hi all,

I am new to the newsgroup and am having some problems with Paris. The following error comes up: "An error occured during playback. The data could not be read fast enough from disk. Try adjusting the system playback parameters, or use a faster drive." Every time I try adjusting the disk cache size and overview cache size and go back into Paris, it locks the computer. This happens in both 2.2 and 3.0 versions. Any idea to why this might be happening? I'd really appreciate some help on this. I'm trying to meet a deadline on a recording.

Take care,

John Solinski
www.johnsolinski.comJohn,

Don't know how much help I can give, but first a couple questions:

1 How many tracks are you running
2 What kind of drive are you using?
3 How much RAM are you working with.
4 What settings are you using for disk cache and overview cache.

It's a starting point.

Jeff

I'll add a very important one - what OS are you using? If you're on a PC, this is the wiki entry on it so far -
http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=DataN otFast

On the other hand, if you're on Mac - although my Mac OS9 days are long behind me I seem to recall that if you assign memory *inside* PARIS (ie in the config window) you need to also add memory to the PARIS app - do it by quitting, selecting the app, doing "get info" and upping the memory allocation to the app in the resulting window. Not doing this can cause lockups even if you have lots of RAM, because the config is basically telling the app to use more RAM than the OS has assigned to it. Also don't assign it too much of your physical memory - leave lots of unassigned RAM for normal OS operations plus any VST plugs you're using (if I recall, their RAM usage isn't part of the PARIS allocation).

- KOK, what you've got is contagious; now I've got it too, on a previously flawless PARIS install after a reboot. Weird. Investigating further.

-k

Nah, this box is 100% firewalled from the net; good thought though.

- KOk, i know i said it sucks but really it does.... hehe
I hope i never hear the album again. There's not one song
I even remotely liked enough to listen to again. (/me turns up Johnny and
Edgar Winter / They only come out at night).

01 Chinese Democracy.mp3

1 minute of wasted time for ambient effect
Alice Cooper sound but not as good, pretty good guitar sound though.
Good vocals and guitar solo

02 Shackler's Revenge.mp3
sounds like a bad movie soundtrack ripoff intro
guitar is totally annoying
lift/pre-chorus is more conventional
chorus is skanky vocal
basic headbanger guitar with obligatory sol

03 Better.mp3
sounds like a britney spears crap song intro
opens into a straight ahead rocker with typical crappy vocals
then goes to headbanger break and back to basic rocking
key change at 2:24 that makes NO musical sense
back to headbanger mode (at least he's not singing)
damn, he started screaming again.....really bad too
really bad splice at 3:25
back to straight ahead rock with actually decent harmonies till he sings again
ends like some gay britney spears song

04 Street of Dreams.mp3
pretty ballad that gets ruined by his vocal
his vocal is SO bad that I can't think of any song I've ever heard this bad
replace the vocal with Ann Wilson and you have a nice song with orchestration even
though the guitar is very boring and could use making some musical statements

05 If The World.mp3
sounds like a movie soundtrack song and the vocal is probably the best on the album
but it sounds like a GIRL ! hahaha The vocal bends are pretty bad though.

06 There Was A Time.mp3
god this intro sucks and it doesn't get much better
I went and played some RUSH YYZ and realized how REALLY bad this is. haha
Nice wah guitar solo though that builds nicely till he sings and ruins it.

07 Catcher In The Rye.mp3
Sounds like an Aerosmith / Bon Jovi song. Straight ahead medium tempo rocker.
Nice key change. Unfortunately the sections of the song don't really fit together.
The song was so boring to me I tuned it out and forgot it was playing.
Is there a story? What the hell is it about ? Who cares !
Plenty of guitar drivel noodling at the end.

08 Scraped.mp3
Skank o rama, can you bang your head ? Good ! you'll love this.
That boy can't sing on pitch to save his life.

09 Riad N' The Bedouins.mp3
intro sounds like your stereo broke. Cool guitar intro goes into
speed metal mode has some wicked guitar chops but the vocals suck as usual.

10 Sorry.mp3
pink floydish wanna be song but very simple and horrid vocals as usual.
very nice guitar solo
Instead, go play Pink Floyd Animals

11 I.R.S..mp3
Sounds like classic GnR. If you like them, you'll love this.
Great drum sound.

12 Madagascar.mp3
starts off like royalty, turns to movie soundtrack drum machine and
is very boring and then gets ruined with Martin Luther King narration
Who the hell wants to hear a narration on an album you will listen to
over and over ?

13 This I Love.mp3
How can anyone like these vocals? It's just beyond me. Let Michael Jackson
sing it and show you what this song could be.

14 Prostitute.mp3
god i hate those cheesy drum machine sounds.
sorry, i'm not big on orchestration in rock music except for maybe
Kiss in Australia DVD. That one rocked.Hi Kerry,

I'm home sick with a cold today. Give me a call if I can help.

All the best,

Mike

>I had my old friend Norm Fisher over yesterday, we were shooting out
bass DIs for his rig. We shot out three Radials (JDI, J48, a
BassBone), my trusty Demeter VTBP-201 and a Bare Knuckle Audio handmade
"black box". We decided the JDI was the way to go (the Demeter was the
fave but it was just for reference, he's not looking for a rackmount;
we'd already shot out the REDDI previously, but although it sounds
killer soloed we love what the Demeter does to bass in the track) since

it made his Sadowsky and vintage P the happiest.

And then Warren, my tenant (the tenant who just happens to be a music editor, an engineer and an ex-Fodera luthier for good measure) brings up a $250 Monster bass patch cord he was given as a gift. We laughed, knowing it was all hype - a decent cable (which we were already using) is a decent cable, right?

Wrong. We weren't laughing after putting it through its paces. Holy snap, the difference between the Monster cable and the regular (good-quality) cable was every bit as profound as the difference between DIs. Less harsh highs, rounder lows, tighter bottom. It's supposedly a "one way" cable, and honestly we couldn't hear a scrap of difference between directions - but the raw sound was *definitely* the surprise of the day.

Norm is Bryan Adams' bassist, and his tech keeps threatening to build him "Monster-quality" patch cables, so next step we get a few of those puppies built and shoot them out against the Monster (I ain't payin' no $250 to a pack of Cayman Island IP rapists if I can help it).

Eeeenteresting.

- KIf you feed it directly into this you'll have multiple orgasms.

If I can get through a few listens without crashing, I'll post a beta.

So far, I've started it several times with no "Tom's Hardware" utility, and
the C16 seems fine.

I moved the code that copies data to and from the cards into the interrupt
service routine, which should resolve the threadsafety issues. I wasn't
able to move some notification code into the ISR, though. The code lets
the app know that some data has been sent or received by the Scherzo. Microsoft
doesn't allow setting events in an ISR. This matters because I won't be
able to create as tight a buffering system as I had hoped for a low latency
ASIO driver. It's just the way it is, I guess.

I'll let you know how this goes.

All the best,

MikeThis is a multi-part message in MIME format.

Well, here's my first real stab at it.

Seems to work well here on my quad core Phenom 9350.

I slowed down the start-up timing a bit when I was troubleshooting my new
PC a while ago. I'm pretty sure I can tighten them back up. But for now,
it works.

Here's the install steps for the brave. :)

the PARIS_StudioControlLibrary.dll goes in the Windows\System32 folder.
be sure to back up the copy your using currently just in case.

The Scherzo.sys goes in Windows\System32\drivers\. Be sure to back up your
current scherzo, too.

Restart, and unless I've just been lucky, you'll have PARIS on a multicore

with no special workarounds.

Let me know how it goes.

Cheers!

Mike
