in the 1970's the same people were squealing about global cooling. Worse, the ice core evidence shows that increases in carbon dioxide level historically follows warming not precedes it. Carbon may not be the problem.

>I'm not about to get into an argument about Global warming...but I do remember my Grade 10 science and the chemical make up of the atmosphere and from that perspective alone Global Warming being caused by CO2 doesn't make any sense and it makes even less sense when you use the numbers the IPCC uses to prove that CO2 emissions are the cause...bad science...plain and simple.

On the otherhand, I reduce, reuse and recycle and have spent thousands of dollars making my home energy efficient and drive as clean and efficient a car as I can afford...I'm doing my part and will continue to do so...but not because of scare tactics and bullshit science but because it's the smart thing to do.
