ent/effect 'racks' which are a bunch
of sounds and/or effects that can be added to a track or a bus all at once.
I'm going to hold off buying any more new hardware/software until I decide
about the Pulsar card (OK, that's a lie, I'm going to buy the UAD Space Echo
but that's it) so I'll pass on the Ableton FM synth for now, but the 6.0
software is worth the upgrade, IMHO.

TCBHey I am the pulsar geek here not DJ :)
Well you don't need neither the adat interface nor the U16 ad/da .
You can buy yourself a pulsar card with classic option that has spdif in
out and analog in out amoung 16 adat in out.
I suppose you have either a mec or a 442 interface.
So you could connect your digital inputs and outputs plus one stereo analog
in out.
So you can have 4 channels at least for starting to send and receive between
paris and pulsar.
Regards,
Dimitrios

If this is the 8" two way box, it is very similar to the MS-802. The interface series were used a lot as radio station program monitors. I personally find them quite bass heavy. *IF* it is the one I am thinking of (8" foam surround woofer as attached), the recone kits for the woofers are still available from EV...PN 81177XX. The phenolic tweeter diaphragms are also stil
