dio to =

these synths I

have to reconnect the USB but the preset that allows the Amiga to edit =
no longer works!

Pain in the sphincter.

Major problem #1:

I set Cubase's MIDI input to #1 which is my controller's MIDI port but =
can't receive data

in Cubase. How should that be set to record MIDI data? I'm hoping to =
figure this out
on my own.
