>Hey Gantt,

I have been told (I'm not a MAC guy, well, not since 7.2!) that MAC's
can read NTFS formatted discs for file transfer purposes. This means
you *should* be able to take the PC drive and drag its contents to
your MAC and open them up. The only other issue I can think of would
possibly be file extension naming.

David.

t of the tracks for 2048 or 4096

NOTE : I have wrapped chainer from Spinaudio to have the 4096 lower latency and have all VU and buttons working.

Note that Spinaudio is free for one plugin so you can wrap only Chainer ...

If you don't have chainer and don't wanna mess with all that stuff here is a workaround.

On track 1 (kick) you put senderella1wrapped from Spinaudiofree. On track 2 senderella 1 again , both tracks as sends with desired amount of volume. On tracks 15 and 16 you put as stereo file the Spinaudiowrapped Senderella1 as return and then on second Paris slot as stereo the free FFX4 (DX chainer)

This gives again the 4096 sample latency for UAD plugins and you load there your UAD reverb

Thus you have the above again situation.

NOTE :

YOU MUST USE EDSTransfer 8,16 for senderella to work.

Regards,

DimitriosHere is my method if you don't have or want to buy chainer.

On track 1 (kick) you put senderella1 wrapped from Spinaudiofree. On track 2 senderella 1 again , both tracks as sends with desired amount of volume. Don't fprget to redirct on sndarella when sending in order not to have double hits.

On tracks 15 and 16 you put as stereo file the Spinaudiowrapped Senderella1 as return and then on second Paris slot as stereo the free FFX4 (DX chainer)

This gives again the 4096 sample latency for UAD plugins and you load there your UAD reverb

I put there 16 bit mono Paf silenced files.

NOTE :

YOU MUST USE EDSTransfer 8,16 for senderella to work.

Regards,

DimitriosNow to compensate for the 4096 samples delay you do the following. Put on each track (tracks 1 and 2 (kick-snare) voxengo FREE sample delay for 4096 samples latency.

Now all tracks are delayed except for the revrbed ones because the senderella is sending BEFORE voxengo .

Regards,

Dimitrios

Now, that be some well-crafted nothing!

yeah-- ChasThat brings back to mind my attempt to save a buck when I was about 16. This was about 1988, and I had myself a decent strat copy with at least one seymour suncan pickup and a nice neck, and had discovered the wonders od distortion via a cheap knock off of the Boxx DS1 I had, which was a PSK pedal from memory. Not too shabby either. I wanted to move up to the world of delay, and of course all the talk was about digital delay, but such pedals went for \$250+ whereas my budget was only about \$120. I managed to find however an electronics shop which sold a digital delay kit for around that price. Suffice to say a week later all I had was a plastic box containing a bunch of (wrongly built) circuits which did nothing whatsoever, and \$120 had gone down the tube...

That may well have been my worst gear purchase ever when I think about it.

Cheers,
Kim.

>Jazzmaster that looked cool. Only 55.00!

A guitar was possibly my worst purchase too... only this one was a real Fender - a 1972 Telecaster Deluxe. Bought in

like '80-'81 or so. What a POS!

I don't even know to describe the extent to what a POS it was except to say it was a complete, total, and utter POS. Anyone who owns one should burn it. Sacrifice it to the gods of shitty guitars in hopes that someday they'll reward you with a Univox Mosrite copy in return LOL!

Neili was lusting after a SG custom and finally got one. at the time it cost me 1200.00 (around 1979) at Guitar Trader in Red Bank. i should have know better when i couldn't tune it at the store. "oh, it only needs a setup." yeah... 3 months later the neck separated at the joint.

another one... i traded my 65 polar white, SG Jr. for a Larivee "super strat." pointy headstock and all. was actually a very nice guitar, neck through and all, but very 80's and ugh... when i think of how nice that SG was. oh well.

:)
