I think this is great and I'm not trying to slag Scientology here.
Personally, I'm leery of all organized things. I even get paranoid when I
see a row of ducklings following their motherexcept that they
aren't ducklings.....they are Roman centurions....and I know in the darkest
depths of my soul that their mother just made the eat something horrible and
they are *PISSSED*!!!!

Then maybe you should start a religion where you convince
your followers that these evil ducklings are living inside of
them and the only way to get them out is for you to hook them
up to a device you've concocted from one of those spare mother
boards you've been trying to sell and a Studio Projects C1;
and they then have to pay you ridiculous sums of money for
this, and then you can also take the lyrics of a song you wrote
shortly after eating some shrooms 20 years ago... you know, the
song that you always thought was great, but that you could
never get a publisher to pick up? Then you could adapt the rest

I have to sing a bunch of '80s tunes for a wedding gig (I never would have predicted it, but '80s is coming back for weddings). In the '80s all the guys sang as high as they could. They were mostly tenors, but I'm a bari and it is a painful struggle singing that high. All these tunes have hooky guitar parts that use open strings, and don't sound or play right transposed down. So, I bought some heavy strings for the Steinberger and tuned it down a whole step and I can play and sing all this stuff nice and comfy now without getting up on tip toes and scrunching my face up. Plus it fits in a tiny gig bag so I can easily bring it along with my other full sized one. That's why it is my new favorite guitar.

BillSounds like a good way to start a fire.

wife and I heard you at our friend's wedding reception recently, and look

forward to you providing music at our daughter's upcoming wedding. We have a list of songs we would like you to play. Don't worry if you don't know all of them. Any Chick Corea composition would be great, but we would especially like you to play "The Three Quartets, No.1" as the guests walk in.

For the bride's mother, please go right into the piano intro to "Quartet No. 2." Keep playing it till she gets up to the altar. Also, have it arranged for the full ensemble. Don't play any of the "Electric Band" songs. Make sure the drummer uses "Evans" drum heads so his drums sound like Steve Gadd, our favorite drummer. Now, when I walk in, please play "Birdland" (but the version from "Live"). My wife and I were at that show, and we particularly like it. If you find it too difficult, you can play "Sister Cheryl" from "Tony Williams Live in Tokyo "

Now, for the song in the middle of the Mass during the communion, we want the singer to sing Alan Holdsworth's "Against the Clock" from his "Wardenclyffe Tower " CD. We love this song and especially the drum solo by Vinnie Colaiuta. We think that it's his greatest solo, although some will argue against this. Keep repeating the drum solo till the priest tells you to stop. Any of John Coltrane's duets w/Pharaoh Sanders would be grand.

I understand that their use of atonality is not everyone's cup of tea, but all of our guests LOVE high register tenor saxes. We thought a little Stravinsky right after the toast would be nice. We particularly like the "Infernal Dance", or whatever it's called, from the Rite of Spring (second version c. 1932). If you want to use the sheet music, that's OK. We like a tempo of about 93. (Ozawa). Faster would be cool, too, but don't play it too slow. That would ruin it.

Next, for the "life candle" lighting ceremony, please play Frank Zappa's "The Black Page." If you want to play it in the original key of Bb minor, that would be fine, but my cousin Janeen would like to sing it, so you may have to play that part in another key (she majored in voice at UCLA).

During the cocktail hour, we want some nice Keith Jarrett tunes from his "Standard Vol. 1 and 2" And, feel free to take things out as far as you like. When my daughter throws the garter, could you play just a little of Varese 's "Ionization"? It's such a cool piece. We think it would go over really well: it's much better than "The Stripper."

Now, for the bride and groom's first dance, please slow things down a bit by doing Barber's "Adagio for Strings." It's so much better than "We've Only just Begun" or "The Anniversary Waltz." When my wife and I join in the first dance, could you please segue to

Subject: Re: Converter quandry

[View Forum Message](#) <> [Reply to Message](#)

Thelonius Monk's "Ruby, My Dear"? That's in honor of my wife's grandmother, whose name was Ruby. It would mean so much to the family. Then, we would like to hear some nice Mexican music while we eat dinner. We love the sound of Los Ponchos, so any of their hits would be great.

Thanks very much for all your help. We'll certainly be happy to recommend your band to all of our friends. We thought that \$50.00 per man for 4 hours would be sufficient. So that's \$350.00 for the entire group. If you get our guests dancing, I will throw in an extra \$50.00. So, get 'em dancing. We want you to be set up TWO HOURS before your start time @ 5:00 pm., and do

not be late.

We don't want to see any cases, bags, coats, boxes, cables, wires, or any unnecessary clutter on the stage or within view of the guests. Play 1 hour and then take a break of no more than 10 minutes, but don't forget, to leave the guitar player or the piano player playing while the rest of the band breaks. Absolutely no drinking! In fact, we don't even want to see the musicians near the bar or food tables. Also, NO TALKING ON STAGE!! Go outside quietly where no one can see you.

Of course, no smoking anywhere. Someone will be watching you on your breaks to make sure you don't consume any alcohol. Before you leave, please feel free to ask the caterer for a sandwich (or, a "bandwich" as you people call them). And, perhaps a soda to take with you.

Oh, and one more thing... and this is very important. In between songs, we don't want to hear any musicians practicing "licks," or running up and down high speed scales. Nothing sounds worse than hearing musicians all "fooling around" at the same time. I believe you people like to call it "noodling," or something like that. But, it is a terrible habit. It's very unprofessional. You don't hear the members of the Berlin Philharmonic "noodling around" between movements, right?

We look forward to hearing you play."Hi Bill,

Back in the late 70's an Austin musician named Chris Geppert was heading up a cover band by the name of Christopher Cross. They used to play lots of private parties and played a lot of gigs at local clubs there, most often at a nightclub called Steamboat 1874 and it's sister club downtown called Steamboat Springs. One of my good friends, a guy named Kerry Flynn, was the owner/manager of Steamboat 1874 and we used to hang with these guys a bit. Chris was a good songwriter, had a decent voice and was a fairly proficient guitar player. The band played lots of his original songs at the club gigs.

He ended getting picked up by a label (I forget which one now) and the band was flown out of LA and Michael O'Martian produced their first (and only) album. Lots of major session musicians played on the album and though the band members were good players and could hold their own, Chris was just no match for guys like Larry Carlton (who played lead on the album). They got major airplay with songs like Ride Like the Wind and Sailing. There were lots of other good songs on the album too...not much filler at all. When they started touring to promote the album, MTV was just getting started and they did a video. Chris looked a bit like the Pillsbury Doughboy. Chris' lack of photogeniety, along with the fact that they didn't bring along the studio guitar slingers to flesh out the musical prowess and give the audiences a semblance of the signature chops on a lot of the album cuts, plus pretty much insured that a second album never happened.....but he did get his 15 minutes and his songs still get airplay on the oldies stations(mailbox money). Had he looked like David Lee Roth (I think he could have even developed a "Meatloaf" kinda *ugly rocker* persona if he had been the type to get into wrteched excess.....he was a family man though) and fired his band, he would have probably been more successful. He had lots of good songs in the can back then.

Hey, I'd have rather heard some properly-applied Autotune the other day as opposed to the car-horn tritones that supposedly passed for vocal harmonies on Jan & Dean's "Surf City" when it came on the Oldies station I was listening to.

>2.) Quantizing

If you had been working on the string arrangement I was fighting with over the past two weeks, you'd have BEGGED for the ability to quantize the backing track. I know I was.

Neillt is the studio I had in the 90's--were you ever there?

Iliff and Quebec basically--we can definitely check it out...
