ks only when All
Tracks is selected in Step 7 above.

To DELETE time across multiple submixes use the DELETE TIME feature in
the Edit menu

1. Find the Kick on the In and Out points and drop markers at both places.
 2. Open the Marker window. Use Reverse Sort* (making it easier to do the math in your head) and subtract to find the EXACT distance between the Markers.
 3. IMPORTANT! Locate the Now Line to the earlier of the 2 Markers.
That's where the cut

Yeah,I played an Oasys the other day.Nice board,but 8k I don't
think so;)

Do you guys have any problem when going from chapter to chapter?
My DVD player jams up and goes to the table of contents after every =
section.
It drives me nuts because I feel like I'm always missing information?
I've tried two different disks but they're both the same so it's either
the DVD production or my lame ass DVD player.

Anybody else?

By the way I still watch it no matter how painful...
Tom

It wasn't as soft sounding as the UAD La2a.
I think increasing the ratio a little bit helped. Not a bad
starting point though. Give it a try if you haven't.

Thanks Dimitrios.

it's fine for the RME interfaces but not so good for the drives.
those are kept on the 400 connection.

>

> I still think a letter from an attorney would have gotten the purchase price

i did talk to my attorney but at the time a solo shot was considered a
waste of time. kinda like when the apc unit failed when the power
company workers tur;ned the power on and off 8 times in a couple of
seconds and blew out several thousands of dollars of gear and
computers. they reasoned that the surge came in through a "back door"
by gear not on the protection circuit. fine but, the only gear
affected was the stuff on the apc.

>

nobody said it was a hybrid, it was just a g4 sold before the rumored
g5 was to come out in a few months...that turned out to be less than a
week.

es things more
complicated.
I would like to have clean (no leakage) trigger sound that could drive
drumagog
perfectly (if you can say that)
I am already using it with real drum sounds but sometimes leakage is an
enemy to perfect sound replacement.
Any insight in this direction would be appreciatted.
Regards,
Dimitrios

I tried the demo, but not in Paris. I had a very similar experience to Jesse.
The Q-cloned eq was almost indistinguishable from the originals I tried.
The only reason I did not purchase it (aside for not liking Waves update

Q-Clone however does allow people to share impulses of good sounding gear. I found that aspect more intriguing. Many people have complained that the process of hunting around through impulses with one db variations is painfully time-consuming, but I found a simple technique that is quick.

Pick an impulse that is close to what you are looking for (like a Neve with 3db boost at 10K) and then use a high quality plugin eq like the Sony Oxford

cloned eq. I use a similar technique with TriTones ColorTone.

Overall, the sound is quite impressive, and CPU/Load issues will soon go

One site sharing high-end Q-Clone impulses:

<http://www.buenosairesbreaks.com/q-clone/>

GeneAlso, if you're looking for synthy synths check into Operator from Ableton, it's a FM synth that (for FM) is actually pretty easy to use. The Spectrum is partially an additive synth which is something I've never been able to get my head around but maybe y'all can.

>I have to tell you that it's more 60/40 these day for me. Now that I built myself a Dedicated VSTi & Giga Machine (PC), powering up my keyboard racks is becoming less less.

Last year I systematically set out to replace all of modlus and import stock(meat & Potatoes) sounds that can get me thru a modern production.
When Spectrasonics updated Stylus to RMX & Battery/Acid, I know long have to use my MPC for sounds, but only as a seqencer.
Here the replacement list:

For Rhodes: Native Instruments : Electick Piano, Scarbee Rhodes

For Real Grand Pianos: Giga Pianos,Soon Ivory
For Synth Bass : Trilogy, Auturia Mini Moog
Pads : Atmosphere,FM7, Albino(!!!),Wavestation
Analogy Synths : Pro 53, Atmosphere,Korg poly 6,Moog,
 CS- 80,Arp 2600
Organs: NI's B4..
Real Strings : Garritan Giga Strings,Sonic Implants,Kirk Hunter

Real Drum Sim: BFD, Battery..
i just em up in V-Stack, boom..remembers each song setups..

If I do use hardware, it's only becuae I just a particualr sound that I have found yet in the vast vsti library. Also, I have a "ganked out" Kurweil K2500XS, That's my Baby. It's has a sound quality second to none!! I have Gigs of internal and external sound in it that just gets the job done..
So, there you have it.

>HDs sound like a good safety net. I have lost data on a couple when they
went bad though.

Was able to retrieve some off of one that would still run, with a recovery
utility.

CDs have worked out good for me for data and MP3s, even using the cheapest
Taiwan cds I mostly got free + tax at sales. For about a year now I have
been

using the DVDs, mostly the +R made in Japan and I hope they hold up for the
long term (x).

But still keeping my important stuff on CD. Optical is really cheap storage
but they

sure scratch easy and are subject to UV light.

Cheers, E
