Ok =

Tom and=20

beloved Paris users here is a nice tip regarding the L and R=20

individual
submix outs...

Ok lets assume you get (DJ are =
you=20

Subject: Re: OT - Global warming alternative opinion movie - fascinating!

[View Forum Message](#) <> [Reply to Message](#)

hearing ??) 6 eds cards and 5 mecs.
Each mec of the four has an =
output=20

card (or use the 20bit outs)
and the fourth has an input card (or =
use the=20

20 bit ins)
Now leave alone card one which has no mec (maybe a 442 =
if=20

cannot get initialised
?) so card 2 L&R outputs from =
withinh=20

patchbay are being outputted on outs
1 and 2 which are connected to =
the 6th=20

eds card's Mec 1&2 analog inputs.
Are you with me so far =
?
same for=20

eds card 3 L&R outputs using analog outs 1,2 of its related=20

mec
connected to the 6th eds card's mec 3&4 inputs.
Same for =

the eds=20
card 4 --- 5&6, and 5 ---7&8.
So now you will have your 4 =
eds=20
cards submix individual stereo outputs MIXED
on a separate eds card =
and put=20
there any DX or EDS effect and then the L
& R outs of the this =
6th eds=20
card will be your stereo mix output which must
be recorded to =
another=20
device computer audio card whatever via the digital
mecs=20
out.
Regards,
Dimitrios

I could have sworn that I tried the
 L&R outs of the Mecs and never got
 signal.
 You are saying that gives you submix
 only data? This is
 crazy.
 I'll be experimenting today for
 =
 & sure.

Chris Ludwig

ADK Pro Audio

(859) 635-5762

www.adkproaudio.com

chrisl@adkproaudio.comI'm leaving Tulsa within an hour or two... rooms are booked for Deej and myself. He said he's coming in town tomorrow probably around 2 or so, but we'll stay in contact via cell - I just probably won't be able to post updates (not sure my Stinkular internet will work out there, raising the bar... on a running man riiight about throat level, LOL).

John and Deej have my cell if anyone needs to reach out to me on the road.

Want to attend and see everything humanly possible.

Regarding the headphone outs =3D
>the =

>submixes, the=20

thoughts around this in order to make it easy
to understand.

We will need One eds card for main card (A) that will be used as a total
mix recorder where you will be able to record up to 8 different mixes of
the same song.

This card A will have a mec which onlt the spdif will be needed basically
on my scenario.

Also you will be needing another eds card lets name it (F) this is why my
scenario will have a total of 6 eds cards which can come down 4 cards to
get any real benefit, for 4 cards just eliminate cards C and D.

Now card F will have a mec too which will have an input card (option A)
OR an ADAT card (option B)

Card B will have a mec too with an analog output card (option A) as so for
the cards C,D and E.

NOW

L & R submix B gets connected to outs 1&2 of its analog out card

L & R submix C1&2 of its analog out card

.....D.....1&2.....

.....E.....1&2.....

NOW

All outs ,we have four sets of analog outs 1&2 will get connected to MEC

F (card F) analog input from 1 to 8.

What have we done so far ?

We have routed all 4 individul submixes of cards B,C,D and E to submix
F on audiotracks 1,2 3,4 5,6 7,8.

ALL audio tracks are alligned !! because we have the same latency foe all
submixes so nothing to nudge here !

You begin to see the benefits so far.

card F serves as a stereo submixer where you can insert on stereo submixes
B,C,D and E any DX/VST or eds effect !

Now you need to be careful with latency.

Need faderworks ??

:)

NOW in continuing...
What are you monitoring ?
You are monitoring submix F analog outs or digital outs !!
You are not monitoring card A !!
How do we record the submix F (which has all audiotracks) ?
We patch the digital out of mec F to digital in of mec A .
Put record enable on tracks 1 and 2 on mec A and record !
To hear what you have recorded just monitor now from Mec 1.
WHY all the above ?
because many of you wanted to use inserts on every submix !
NOW option B
You will need an spdif to adat summing device like AI4 from Alesis.
Well it is AES to adat so you convert your spdif to AES either with a simple resistor on a XLR or buy some canare AES/SPDIF transformers.
You will connect all spdif outs oof MEC B,C,D and E to AI4 and the adat out of this to Mec F adat card.
This way you are sending DIGITALLY your submixes to card F and don't loose much if anything...
I would like your thoughts and maybe suggestions to better this !
Regards,
Dimitrios

Ok a friend of mine is telling me he tried Mac for the first time since = the 80's.

He tried a 2gig 512mb G5 powerbook and it was totally solid.

He says it was so incredibly solid that they had tons of media playing and internet running etc.. and not one glitch. No lag nothing.

What is the consensus on Macs for audio apps now?

Would Cubase run lightspeed under Mac opposed to PC?

Brandon

-----=_NextPart_000_0027_01C78CA5.5924E0B0--There's no G5 powerbook. I don't think any of
the current Macbook Pros
come with less than 1GB RAM.

The current Intel core 2 duo Macbook Pros are very fast and work great
for audio.

The next version may come out this month with the new support chipset
which should allow access to more than 3GB RAM.

The Macbook (non "pro") is about as fast in everything but graphics. A
little less screen space and no expansion slot, but it should also be
very good for audio.

Can't answer the cubase question, I use Logic Pro.

Cheers,
-Jamie

Consensus is that Mac _is_ a PC now. Only real difference is Mac OSx or =
Windows XP/Vista (which includes roll your own boxes) or Linux if =
you are so inclined. Is that the question you're asking, which OS =
basically? If so.. Win platform PC is cheaper on the overall and has =
more options. With options come brand a/brand b (hard and software) =
conflicts. Choose wisely and you'll have trouble free operation on =
either side of that coin IMO. If you go Mac hardware, you can run both =
operating systems.

-----=_NextPart_000_0052_01C78CAA.D04BDC70--I can do lunch both days since the places are nearby.

Thursday I have an afternoon commitment so I'd have to split at about 1PM. I also have an evening show (playing music with a comedy group at a public show in a downtown Denver theater).

Friday is open and I'm flexible for studio tours.

Saturday is swamped but if anyone's still around feel free to come out to my rock gig that night at the pub in Lakewood, they serve food so we could do a dinner thing before the show.

Cheers,
-Jamie

>Hi Brandon,
If it is a Mac Book pro then it will run Cubase about the same as a
equivalent PC. You would not be using 512 megs of ram on any computer
using Xp or OSX. 1gig is the normal for any laptop now. If the guy is
really talking about a g4 laptop then no it will not anything faster
than a current PC or Mac Book pro laptop.

Chris

Il software first...

then drivers....

then put in the cards... 1 at a time?

then determine which one PARIS is calling the master card.... and connect
that card to master mec.

i am doing this on XP. i realize i need to install the effects subsystem.
i have those directions... i just need a quick refresher on the 98se
install.... so i have my bearings for an XP install.

does anyone mind?

jeremy

p.s. can you believe someone so technically challenged actually has a mix
thats #12 on the A/C chart... "change"... kimberley locke.

;-)oh sorry...

the instructions are in the xp drivers zip file.

there is a readme.txt in there.

perpetually goofing off,
jeremy

connected hardware. installed new drivers. installed new pci drivers.
installed paris software. installed effects subsystem. in that order.

XP finds 3 ENSONIQ Scherzo devices under System Devices.

paris.exe is in Program Files\E-MU\Paris Pro.

that's where the subsystem went.

any ideas?

jeremy

I could meet you and Aaron around noon but I'd have to split at about
1pm. Maybe that Mexican place?

I'm going to have to miss out on Swallow Hill tomorrow evening. I'm
playing a comedy show downtown.

Friday is more free for me, plus DeeJ will be here (and maybe Dedric),
so how about if we do lunch at US Thai, tour your studios and whatever
else anyone wants to do on Friday afternoon?

Cheers,
-Jamie

paris is launching.

attaching 2nd mec now.

how do i get the NoLimit plugin that i purchased?

i thinks its on my old 98se drive which is kaput.

i don't recall there being any registering.... just buy it.... get it in email.... install.

maybe its on a backup drive i have.

the babbling goof roles on.... stay tuned.

ha.

DJ does this much better... only he doesn't babble and he actually knows what he is doing.

tried every config of bnc from mec1 to mec2... as far as termination.

the correct way is.... WClock out mec1 into mec2.... terminate mec2 out.

right?

what is 18/12 anyone know?

i've had to much coffee.

>Hey guys- if you're bored Saturday:

My jazz quartet is playing at the Civic center downtown
from 12:30-1:15pm,

and I'm playing at Ziggy's on 38th (just west of Sheridan) with
one of the finest blues men in the world, Stanley Milton,
9:30pm-1:30am.

I'm pretty slammed otherwise, though if I can make the Friday
lunch, I will call John.

It would be great to meet some of you who have been a huge help
to me over the years.

Chris
